

# STANLEY®

## TOOLS AND STORAGE 2018

# STANLEY®

Since 1843 we've been delivering hardworking, innovative and powerful tools that tradespeople can trust and to this day we're here for one reason: to help Pro's get the job done better. As the industry evolves and changes around us, we listen to and work with our end-users to develop and hone our tools to suit the needs of the modern pro – helping them to excel in a competitive environment. We do it side-by-side with the experts who know more about tools than anyone else: tradespeople. Listening to what they need and creating products together. And it's what makes our tools PRO AS STANDARD.

## Global Timeline

**1843**

The STANLEY Works was founded in New Britain, Connecticut by Frederick T. Stanley.

**1863**

STANLEY introduced hammers to their line-up.

**1921**

A new logo is introduced to symbolize the merger of the STANLEY Rule & Level Company and the STANLEY Works.

**1936**

STANLEY manufactured its first utility knife.

**1937**

Henry Phillips, inventor of Phillips head screw, chose STANLEY as the first company to begin making Phillips screwdrivers.

**1961**

The world's first retractable blade knife. The iconic STANLEY 99E knife.

**1969**

The PowerLock® Tape Measure represented STANLEY as a part of Apollo 11's Lunar Landing Gear.

**2011**

STANLEY launches Carbide blades.

**2016**

STANLEY introduces the FATMAX® Spring Assist Knife to continue innovation in core product categories.

**2017**

Continuing to adapt to the marketplace, STANLEY introduces the STANLEY SmartConnect App.

**1844**

Begin to manufacture ivory and boxwood rules.

**1869**

Purchased Bailey, Chaney and Company and acquired the right to manufacture tools under Bailey's patents.

**1924**

STANLEY filed a patent for the ratcheting screwdriver.

**1930**

STANLEY made the first steel tape measure.

**1963**

STANLEY opens the largest hand tool plant in the world in New Britain, CT. The same year, they introduce the PowerLock® Tape Measure.

**1999**

STANLEY launches the FATMAX® Tape Measure and the FATMAX® Anti-Vibe® Hammer.

**2013**

STANLEY launches the next generation of hand tools.

**STANLEY**

**2018**

Coming in 2018 the new STANLEY® FATMAX® next gen tape measure. STANLEY is looking to the future with new methods of manufacturing, materials and more.

## CATALOGUE GUIDE

8

## MEASURING, LEVELLING AND LAYOUT

- 10 Short Tapes
- 17 Long Tapes
- 20 Rules
- 24 Electronic Measuring
- 30 Levels
- 34 Torpedo & Line Levels
- 37 Marking Out Tools
- 41 Chalk Lines

46

## LASER LEVELLING AND DETECTION

- 51 Line Lasers
- 56 Laser Range
- 58 Laser Accessories
- 63 Intelligent Tools
- 66 Detection

70

## TORCHES

- 72 Headlamp Torches
- 73 Tripod Torches
- 74 Hand Torches

76

## KNIVES AND BLADES

- 79 Fixed Blade Knives
- 83 Retractable Knives
- 88 Safety Knives
- 91 Snap-Off Blade Knives
- 93 Craft & Pocket Knives
- 97 Knife Blades

102

## MULTI-TOOLS

- 104 Multi-Tools

106

## SCREWDRIVERS

- 110 Screwdrivers
- 120 Ratchet & Multibit Screwdrivers
- 124 Precision Screwdrivers
- 126 Screwdriver Bits
- 131 Drills

132

## SAWS

- 135 Saws
- 138 Specialist Saws
- 145 Mitre Boxes
- 146 Hacksaws

150

## CHISELS, PLANES AND SURFORM

- 153 Wood Chisels
- 162 Planes
- 168 Files and Rasps
- 170 Surform

174

## DEMOLITION, HAMMERS AND COLD CHISELS

- 177 Demolition Tools
- 180 Masons' Cold Chisels
- 182 Engineers' Cold Chisels & Punches
- 186 Hammers

192

## CLAMPS AND PLIERS

- 195 Clamps & Vices
- 202 Pliers
- 210 Bolt Croppers, Nippers & Pincers
- 212 Snips
- 214 Mole Grips

216

## SOCKETS, SPANNERS AND WRENCHES

- 219 Socket Sets & Accessories
- 233 Wrenches & Spanners
- 241 Key Sets

244

## STAPLING, RIVETING AND GLUING

- 248 Staple Guns
- 252 Hammer Tackers
- 253 Riveters
- 254 Glue Guns

258

## PLUMBING AND DRYWALL

- 260 Plumbing Tools
- 262 Drywall Tools

268

## TOOL STORAGE

- 270 Toolboxes
- 277 Technician Cases
- 278 Soft Storage
- 286 Tool Belts & Pouches
- 290 Organisers
- 296 Rolling Workshops & Tool Chests
- 303 Workbench
- 304 Sawhorses
- 306 Metal Storage

# USER GUIDE

## THE NAMES

### STANLEY

Solid, well-built, innovative tools for general everyday use. Hardwearing and reliable, with added pro-inspired features like Mylar® or Tylon® coating to give your tape greater durability, or knives with Instant Blade Change to reduce your downtime.

### STANLEY FATMAX

Tools with real pro performance built in. Whether you're a specialist who needs a specialist tool, or you simply want to bring the very best tool out every time, these are the tools you're looking for. Every one comes with innovative features that help you work faster, hit harder or cut sharper.

## THE ADVICE

But the catalogue isn't only about the tools. It's also about getting the best from them, and learning what other pro's think of them. So you'll also find expert pro advice about using each tool.

### REAL PRO ADVICE

At STANLEY, we know that professional tradesmen the world over have more respect for each other's opinions than anything we might say. That's why we ask Real Pro's like you who use them in the real world every day, for your honest reviews and ratings of our all our tools.

### THE PRO'S ADVICE

CHOOSE THE RIGHT KNIFE, DO THE BEST JOB

**FIXED BLADE KNIVES**

Designed for heavy applications and consistent use. The rapid blade changing mechanism means you spend less time changing blades.

**RETRACTABLE BLADE KNIVES**

These offer similar performance to the fixed blade models, but the blade can be retracted safely into the handle when not in use.

**SNAP-OFF BLADE KNIVES**

The snap-off blade offers a constant sharp edge, but is also strong and thick enough to apply heavy pressure without the blade breaking.

**CRAFT, SPORT AND POCKET KNIVES**

Handy pocket, craft and sports knives ideal for a wide variety of tasks.

**SAFETY KNIVES**

Ideal for the warehousing environment. They include features such as auto retract and spring loaded blade technology to prevent injury when opening boxes, packaging and wrapping.

**SAFETY CUTTERS**

Ideal for opening packaging with small, rounded, serrated safety blades.

# PRODUCT INFORMATION EXPLAINED

Below is an example of one of our FatMax® products with the main features highlighted, together with all the product variations and prices contained in an easy to read table.

## FATMAX® PRO TWIN BLADE KNIFE

### STANLEY FATMAX

Bigger than standard utility knives allowing work with gloved hands

Instant blade change button for convenience

Thumb pad for extra grip

SUPPLIED WITH 2 STANDARD AND 2 HOOKED BLADES

Twin blade knife accepts all standard blades

Safety interlock when one blade is in use, the other slider is in a locked position

Blade storage for 5 blades

Swing out blade storage for fast blade changes

GREAT DESIGN. WOULD RECOMMEND TO ANYONE

Stokee, Central Heating Engineer

## FATMAX® AUTOLOCK TAPE

**STANLEY  
FATMAX**

**BI MATERIAL  
IMPACT  
RESISTANT  
CASE**

Provides sturdy,  
slip resistant  
hold

**CLASS II  
ACCURACY**

**PATENTED REVERSE  
LOCK MECHANISM**

For greater control and  
increased blade life

**AUTOLOCK  
FUNCTIONALITY**

Can be turned off or on using  
the button mechanism

**INCLUDES  
DETACHABLE MAGNETIC  
AND XL HOOKS**

For improved efficiency. Choose when  
to use the magnetic functionality

**INCLUDES SECURE  
HOOK STORAGE**

Extra hooks won't get lost in use

**BLADE ARMOR COATING**

Double the blade life and reduces  
the risk of the blade breaking by 95%  
(on the first 80mm)

**3 RIVET END HOOK**

40% stronger than a 2 rivet  
construction

**CAN BE TETHERED**

For additional safety when  
working at height

**MYLAR® COATED BLADE**

Up to 10 times more resistant to  
abrasion than normal lacquered blades

**32MM WIDE BLADE**

Providing 3.4m blade standout for  
increased reach and easier measuring

**TRU-ZERO END HOOK**

Moves for accurate internal and  
external measurements

**“ ROBUST, ACCURATE  
AND INNOVATIVE ”**

FATMAX® MAGNETIC TAPE

STANLEY  
FATMAX

- Magnet operates independently from the end hook, no more false readings
- Class II accuracy
- Huge standout of 3.35m for easy one person measuring
- Mylar® coated blade is up to 10 times more resistant to abrasion than normal lacquered blades
- Blade Armor coating on the first 100mm reduces the risk of breaking the tape by 95%
- Wide 32mm blade makes reading the numbers easy
- 3 Rivet end hook 40% stronger than a 2 rivet hook construction
- Specially designed hook grabs on side, top or bottom for versatility
- Cushion grip provides sturdy, slip-resistant hold

TYLON DUAL LOCK TAPE

STANLEY

Bi-Material ergonomic grip and shock resistant case

Dual lock consists of auto-lock + fixed blade lock

Class II accuracy

True Zero Hook

Tylon Blade Coating ensures greater durability and wear resistance of blade markings for improved readability and prolonged product life

Up to 1.75M stand out which is convenient and efficient for measuring

# THE PRO'S ADVICE

## UNDERSTANDING TAPE MARKINGS

- Tape Length
- Norme CE
- Manufacturer
- Category of metrology/year of production
- Notified body number
- Type examination certificate number
- Tape classification accuracy class
- Reference testing temperature

- 16" (US) or 40cm (UK)
- 19.2 in. 'Black Diamonds' equal truss lengths for roofing materials. (5 length per 8m sheet). (US)

# THE PRO'S ADVICE

## MAKE YOUR TAPES WORK HARDER

### IMPROVE ACCURACY

Tilt the curved blade as close as possible to the surface you are measuring.

### MARKING OUT CIRCLES

Pivot the hook slot on a nail or screw inserted into the work-piece and hold a pencil at the length of the radius required.

### MINIMISE MEASUREMENT ERROR

When fitting one component to another, such as a door into a frame, minimise the risk of error by making a pencil mark on the back of the tape blade to indicate the actual dimension, then transfer it to the door. The pencil mark can easily be removed with a damp cloth.

### PENCIL GAUGING

Use the small notch in the end hook for 'pencil gauging' parallel lines down the length of the material, using your finger or the mouth of the rule case to maintain a fixed distance from the edge.

### AVOID TAPE DAMAGE

Control the rate of rewind and ensure that the tape doesn't kink.

### TIP FOR ELECTRICIANS

The blade of a STANLEY tape can make an excellent, makeshift 'Fish Tape' for drawing cables through cavities.

### SETTING OUT JOISTS

Simply use the conveniently diamond marked 40cm/16" centres.

### IMPROVE ACCURACY

If the end hook interferes with accuracy by holding the blade off the surface, try laying the tape flat on the work and make your measurement from a convenient 'zero' point such as 10cm, so a measurement of 10cm would appear as 20cm on the tape.

### STRAIGHT LINES

You can draw a straight line simply by turning the blade over.

# LONG TAPES

## EUROPEAN PRECISION STANDARDS permissible tolerances

CLASS	10m +/-	20m +/-	30m +/-	50m +/-	100m +/-
II	2.3	4.3	6.3	10.3	20.3

### FATMAX® STEEL BLADE LONG TAPE

**STANLEY**  
**FATMAX**

- Trigger clip to attach to belt loop
- Stainless steel metal crank
- Class II accuracy
- 9.5mm steel blade with large graphics for easy read
- Geared quick release button to pull blade from the body without the handle rotating to protect the hand from cuts
- 5:1 Gear ratio for quick blade return
- Bi-material case providing grip in damp conditions
- Barbed folding hook

STANLEY	Length	Carded	6	3253560341329	£
0-34-132	30m / 100'	Carded	6	3253560341329	33.42

STEEL BLADE LONG TAPE

STANLEY

- Class II accuracy
- 9.5mm steel blade with easy to read markings
- Barbed folding hook
- Hook stores conveniently in case
- Steel metal crank
- High impact ABS closed case to withstand severe working conditions

STANLEY	Length				£
0-34-107	30m/100'	Carded	6	3253560341077	25.43

CLOSED CASE FIBREGLASS LONG TAPE

STANLEY

- High impact ABS closed case to withstand severe work conditions
- White surface with 2mm graduations for precise measuring
- 12.7mm wide blade
- Corrosion-resistant, UV protected, non-conductive tape
- Tape blade has washable PVC coating to increase life
- Class III accuracy

STANLEY	Length				£
0-34-296	20m	Carded	6	3253560342968	10.55
0-34-297	30m	Carded	6	3253560342975	14.28
0-34-262	30m/100'	Carded	6	3253560342623	14.28

POWERWINDER OPEN FRAME FIBREGLASS LONG TAPE

STANLEY

- Folding tru zero end hook for accurate inside and outside measurements
- 13mm wide blade
- Rewinds 3 x faster with 3:1 gear ratio
- Reinforced blade end for long life
- End loop for easy pulling and anchoring
- Slip-resistant rubber grip handle
- Blade bumper to help prevent blade damage
- Comfortable contoured handle
- Durable and impact resistant construction for long life
- Class II accuracy

STANLEY	Length				£
2-34-772	30m	Carded	2	3253562347725	25.36
2-34-775	60m	Carded	2	3253562347756	36.88
2-34-777	100m	Carded	2	3253562347770	46.09

OPEN FRAME FIBREGLASS LONG TAPE

STANLEY

- 2-sided blade graphics with fractional decimal/inch foot scales
- Integrated ground spike to help one person measuring
- 12mm wide blade
- Folding crank for storage & transportation
- Barbed folding hook to anchor the blade
- Anti-shock ABS frame to withstand heavy duty use
- Bi-material handle for greater comfort
- Reinforced fibreglass tape reduces elasticity & improves measuring accuracy
- Corrosion-resistant UV protected, non-conductive tape
- 2mm graduations for precise measuring
- Tape blade has washable PVC coating for durability
- Class III accuracy

STANLEY	Length				£
2-34-791	30m/100'	Carded	2	3253562347916	21.70
2-34-794	60m/200'	Carded	2	3253562347947	31.65

THE PRO'S  
ADVICE

MAKE YOUR LONG TAPES WORK HARDER

LOCK THE BLADE & APPLY TENSION

This reduces measurement inaccuracies due to blade droop when measuring across open spaces and uneven surfaces. Use the hardened ground spike on the open framed tape to achieve more tension. The principal benefit of the open frame is that debris carried by the tape does not affect the functioning of the tape mechanism.

AVOID TAPE DAMAGE

Take care when rewinding to prevent damage to the blade. The rapid rewind of the FatMax and PowerWinder tapes is very useful but needs to be slowed down as you near the last few metres. Avoid twists and kinks in the blade, particularly steel, as this could result in breakage. Wipe the blade clean as you rewind, particularly with an enclosed case model.

DON'T LEAVE EXPOSED TO THE SUN

Both steel and fibreglass tapes should be kept away from excessive heat from the sun to reduce the risk of expansion and stretch.

MARKING OUT CIRCLES

All end hooks have the facility to mark out large radii as needed in marking out sport pitches.

# RULES

EUROPEAN PRECISION STANDARDS permissible tolerances

# THE PRO'S ADVICE

## ELECTRONIC MEASURING – CHOOSING THE RIGHT MODEL

Check the product comparator opposite to see which model in the range is the best for you. To help make your selection, shown below are typical calculations that can be made by models in the range.

**1 DISTANCE**  
Measure distances up to 200m depending on model

**2 AREA**  
Calculate the area of a ceiling or floor with just two measurements

**3 VOLUME**  
Room volumes are calculated automatically using only three measurements

**4 HEIGHT (PYTHAGORAS CALCULATION 1)**  
Measure heights at a distance using two measurements

**5 COMBINED HEIGHT (PYTHAGORAS CALCULATION 2)**  
Measure combined heights of walls both above and below the horizontal

**6 TRACKING**  
Unit operates like a tape measure, continuously measuring all distances between the unit and the targeted points

**7 HEIGHT TRACKING**  
Unit operates like a tape measure, continuously measuring all heights between the unit and the targeted points

**8 DISTANCE WITH OBSTRUCTION**  
Use the internal inclination sensor to calculate distances even with obstructions

**9 TRIANGULAR AREA MEASUREMENT**  
Calculate corner angles from three distance measurements

**10 PARTIAL HEIGHT (PYTHAGORAS CALCULATION 3)**  
Get accurate measurements of partial heights for measuring walls and windows or balconies

**11 STAKE OUT FUNCTION**  
Two different distances (a and b) can be entered and can then be used to mark off defined measured lengths, e.g. in the construction of wood frames

# ELECTRONIC MEASURING

## STANLEY MEASURE APP

**STANLEY**

### MEASURING HAS MET ITS MATCH

Quickly capture measurements and create custom floor plans with the STANLEY Measure App.

## STANLEY MEASURE APP

#### CAPTURE MEASUREMENTS

From the home screen, use your STANLEY Laser Distance Measurer to capture measurements in real time.

#### DRAFT A ROOM PLAN

Draw your walls and use your LDM or tape to capture measurements. Add windows and doors to your room.

#### MARK UP PHOTOS

Use your camera roll or take a photo. Draw measurement lines, then use your LDM or Tape to add measurements.

#### ORGANISE YOUR PLANS

Organise your plans (Rooms, Photo Markups, Measurements) into Projects. Edit and share your plans with others.

The STANLEY Measure App offers 3 main features to end users. It allows them to:

- Capture measurements
- Mark up photographs
- Create room plans

These measurements, photographs and room plans can be organised under Project names. All of this can be done either;

- Via a STANLEY bluetooth enabled tlm
- Or entered manually from measurements with a tape measure, giving the ultimate flexibility

LEVELS ARE SOMETIMES USED AND ABUSED ON SITE. THAT'S WHY WE HAVE BEEN WORKING WITH REAL PRO'S TO DESIGN A LEVEL THAT'S UP TO THE JOB. THE NEW LEVELS HAVE A MACHINED BOTTOM AND CONCAVE SIDES TO KEEP THEM DURABLE AND TRUE. AND WITH A MAGNIFIED EASY TO READ VIAL, YOU CAN KEEP THE JOB ON TRACK.

“ AS A BRICKLAYER THIS IS THE ONLY LEVEL I WOULD USE. STURDY, RELIABLE AND AS TOUGH AS OLD BOOTS ”

PJOK - BRICKLAYER

# THE PRO'S ADVICE

## THE RIGHT LEVEL FOR THE JOB

### SELECT THE RIGHT LENGTH OF LEVEL

The longer the better, particularly if the surface to be levelled is not perfectly true. A shorter level will tend to follow the contour of the surface, whereas a longer level will even out the undulations. For bricklaying and general builders the best choice is the 1200mm FatMax and for concreters the 1800mm would be a good choice. Finish carpenters may prefer a lighter box or I-beam section body in a length of 600 or 900mm, ideal for fitting kitchen furniture and general trim work.

### ADJUSTABLE VIAL LEVEL

The rotating vial can be adjusted to between 0° and 90°, enabling you to set angles for roofing or drainage pipes etc.

### TORPEDO LEVEL

The FatMax® Torpedo Level has a V-groove machined in the magnetic base, which allows it to fit firmly on pipe work, ideal for scaffolders, plus it is also perfect for installing machinery, air conditioning ducting or shelving.

### BOX BEAM LEVELS

The box beam profile provides the ultimate in terms of overall strength and performance. They are fitted with solid block acrylic vials that have been machined to exacting tolerances to ensure that the movement of the bubble is smooth and comes to rest quickly. A small magnifying area in the centre makes reading the position of the vial easier.

### 'I' BEAM LEVELS

I-beam or girder section levels offer a lighter weight alternative, fitted with tubular 360° vials.

# LEVELS

## FATMAX® SITE I-BEAM LEVEL

**STANLEY**  
**FATMAX**

**0.5mm accuracy – best in class**  
The accuracy of a level is measured on a calibrated steel reference beam. Accuracy is defined as the maximum amount that a 1 metre level needs to be raised at either end to ensure that the bubble is perfectly centred within the inner marked lines on the vial. FatMax® levels have an accuracy of +/-0.5mm/m on one face and 0.7mm/m on the other.

STANLEY	Description				£

## FATMAX® PRO BOX BEAM LEVEL

**STANLEY**  
**FATMAX**

Magnetic option has rare earth magnets, which are twice as strong as basic strip magnets, built into the level for stability

**0.5mm accuracy – best in class**  
The accuracy of a level is measured on a calibrated steel reference beam. Accuracy is defined as the maximum amount that a 1 metre level needs to be raised at either end to ensure that the bubble is perfectly centred within the inner marked lines on the vial. These FatMax® levels have an accuracy of +/- 0.5 mm/m and are backed up with a 10 year warranty.

# TORPEDO AND LINE LEVELS

## FATMAX® PRO TORPEDO LEVEL – MAGNETIC

**STANLEY**  
**FATMAX**

- Solid block vials provide best-in-class accuracy 0.5mm/m
- V shaped metal groove for use on pipes
- Magnified centre vial for improved all round visibility
- Rare earth magnets which are twice as strong as basic strip magnets

Rotating vial

STANLEY	Length				£
0-43-609	250mm/10"	Loose	6	3253560436094	23.04

## FATMAX® TORPEDO LEVEL

**STANLEY**  
**FATMAX**

- 230mm/9" Aluminium die-cast body
- 0.5mm/m accuracy
- Two magnets in the base ideal for erecting scaffolding
- Pipe groove provides maximum adherence to rounded surfaces
- 5 year accuracy guarantee

STANLEY	Description				£
0-43-603	230mm/9" FatMax® Torpedo Level	Loose	6	3253560436032	21.18

## SHOCKPROOF TORPEDO LEVEL

**STANLEY**

- Aluminium plate with V shaped metal groove to check cylindrical surfaces (e.g. for use on pipes)
- High visibility vials horizontal, vertical and 45°
- Rubber end caps provides excellent protection

STANLEY	Description				£
0-43-511	230mm/9" Magnetic	Loose	6	3253560435110	14.87

## ALUMINIUM TORPEDO LEVEL

**STANLEY**

- Strong & lightweight aluminium body ideal for small installations
- Magnetic base ideal for steel construction
- 3 vials: horizontal, plumb and 45° for wide usage
- Protected central vial for resistance to shocks

STANLEY	Description				£
0-42-465	230mm/9" Magnetic	Loose	6	3253560424657	13.64

## PLASTIC TORPEDO LEVEL

**STANLEY**

- Lightweight injection moulded ABS body for strength
- 3 tubular vials horizontal, plumb and 45°

STANLEY	Description				£
0-42-294	200mm/8"	Loose	6	3253560422943	6.20

## LINE LEVEL

**STANLEY**

- Useful for setting out levels over large areas where precision is of secondary importance e.g ideal for landscape gardening
- Includes hooks for using on a line
- Lightweight metal body for long life

STANLEY	Description				£
0-42-287	80mm/3"	Loose	6	3253560422875	3.10

## POCKET LEVEL

**STANLEY**

- Pocket sized level for easy storage
- Accuracy 1mm/m
- Easy to read vials
- Strong molded plastic casing for durability
- Machined, magnetic base

STANLEY	Description				£
0-42-130	Pocket Level	Carded	6	3253560421304	11.93

# THE PRO'S ADVICE

## THE RIGHT MARKING OUT TOOL FOR THE JOB

### COMBINATION SQUARE

An essential part of the on-site carpenters' tool kit, as it incorporates a range of functions in one tool: square, mitre square, depth and height gauge, level, steel rule and built in scribe.

### SLIDING BEVEL

Designed for replicating and marking out angles, but should be used with a protractor if you wish to set it to a specific angle.

### CARPENTERS FLAT STEEL SQUARE

Ideal if you regularly need to mark out large sheets of panelling. Both arms of the square are graduated.

### MARKING GAUGE

Used for scoring lines along the length of a piece of wood parallel to the face edge or face side. It is more accurate to saw or plane to a scored line than it is to work to a pencil line. The gauge consists of a stock, which rubs against the face edge or face side of the work and a graduated stem which holds a hardened scribing pin. The distance of the pin from the stock is set by a rule and the stem locked in position with a thumbscrew.

### FOLDING SQUARE

Invaluable for large scale setting out of building profiles, foundations, floor tiling, paving, driveway construction and landscape gardening. The simple folding system makes it compact and easily portable.

### CHALK LINE

Used for marking straight lines on the ground, wall or ceiling. An essential part of the builders' and fitters' tool kit for setting out brick courses, tiling and installation of fitted furniture etc. The FatMax model provides 3 times more abrasion resistant line, together with many other innovative features.

# MARKING OUT TOOLS

### FOLDING BUILDERS' SQUARE

#### STANLEY

- Measuring 1200mm x 1200mm x 1720mm – 48" x 48" x 68"
- Solid, light aluminium square ideal for checking and chalking in shell construction, tiling and assembly of partitions
- Angles of 45° and 90°
- Easy to fold and store with hang hole

STANLEY	Description				£
1-45-013	1720mm x 1200mm	Loose	4	3253561450136	48.17

### BI-COLOUR SQUARES

#### STANLEY

- ABS construction job site tough
- Bi-colour 2 shot moulding no printing, etching or engraving – all markings are resistant to wear and abrasion
- Angles, hip valley and common cut scales for all roofing applications
- Available as 7" or 12"

STANLEY	Description				£
STHT46010	7" Bi-Colour	Carded	3	076174460100	12.03
STHT46011	12" Bi-Colour	Carded	4	076174460117	17.13

### ADJUSTABLE QUICK SQUARE

#### STANLEY

- Heavy-duty aluminium construction for durability
- Black body with yellow graduations provides maximum readability in various light conditions
- Features Common, Jack and Hip, and Valley scales for various applications
- Multi-purpose, adjustable design can be used as a saw guide, bevel or protractor
- Comes with an adjustable arm

STANLEY	Description				£
46-053	Adjustable Quick Square	Carded	4	76174460537	23.69

COMBINATION SQUARE

STANLEY

- Cast iron professional combination square for accuracy & long life
- Can be used as a try and mitre square, depth or height gauge and spirit level
- Blade etched with imperial / metric graduations in mm & cm and inch and 1/8" and 1/16"
- Machined on all faces for accuracy
- Class I accuracy steel rule

STANLEY	Description				£
0-46-151	300mm / 12"	Carded	1	3253560461515	37.23

COMBINATION SQUARE

STANLEY

- Can be used as a try and mitre square, depth or height gauge and spirit level
- Precision die-cast body with 3 precision machined faces for accuracy
- Metric / imperial graduations
- High visibility reading with etched and coated blade – rust resistant
- High quality brass nut and scriber fittings for long life
- 360° vial for all round visibility
- Class II accuracy steel rule

STANLEY	Description				£
2-46-028	300mm / 12" Die Cast	Carded	3	3253562460288	24.79

COMBINATION SQUARE

STANLEY

- 300mm / 12" metric imperial for ease of use
- Lightweight and durable metal body with 3 machined faces for accuracy
- Easy to read, long lasting stamped blade
- 360° vial for all round visibility
- Scriber fitting for accuracy & convenience
- Can be used as a try and mitre square, depth or height gauge and spirit level

STANLEY	Description				£
2-46-222	300mm / 12"	Carded	6	3253562462220	12.39

CARPENTERS' STEEL SQUARE

STANLEY

- Steel square with buffed finish and protective lacquer coating for rust resistance
- Reverse reading scale and crisply embossed graduations for easy reading
- Face graduated every 2mm, reverse of blade every 1/8" for detailed work
- Not supplied with databook

STANLEY	Description				£
1-45-530	600mm / 400mm (metric only)	Loose	6	3253561455308	29.05

ROSEWOOD JOINERS' BEVEL

STANLEY

- High quality rosewood joiners' bevel
- Brass tips and blued steel blade for long lasting, highly accurate marking

STANLEY	Description				£
0-46-702	225mm	Carded	6	5011284153592	26.04

PLASTIC JOINERS' BEVEL

STANLEY

- Sliding blade in hardened blued steel
- Chrome plated metal locking lever to secure blade
- High impact plastic moulded stock with accurately machined face combining lightweight and accuracy

STANLEY	Description				£
0-46-825	200mm	Carded	6	3253560468255	13.20
0-46-529	228mm	Carded	6	3253560465292	14.15

MARKING GAUGE

STANLEY

- Plastic marking gauge
- Plastic stock with metal insert for abrasion resistance
- Stem calibrated for easy setting
- Graduation at 2mm

STANLEY	Description				£
2-47-064	215mm	Carded	5	3253562470645	12.39

FATMAX® BLACK CHISEL TIP PERMANENT MARKER

STANLEY  
FATMAX

- Durable chisel tip allows for 2 distinct lines (broad and fine)
- Quick drying water and oil resistant ink marks on almost any surface
- Easy to hook on a belt

STANLEY	Description				£
0-47-314	2pk	Carded x 2	12	3253560473143	3.92

FATMAX® BLACK FINE TIP PERMANENT MARKER

STANLEY  
FATMAX

- Quick drying water and oil resistant ink marks on almost any surface
- Easy to grip non slip barrel and cap
- Easy to hook on a belt

STANLEY	Description				£
0-47-312	2pk	Carded x 2	12	3253560473129	3.34

BLACK FINE TIP PERMANENT MARKER

STANLEY

- Quick drying water resistant ink marks on almost any surface

STANLEY	Description				£
0-47-316	2pk	Carded x 2	24	3253560473167	2.29

MINI MULTI FINE TIP PERMANENT MARKER

STANLEY

- Quick drying water and oil resistant ink marks on almost any surface
- In variety of colours for different applications (black, red, green and blue) e.g. live, earth and neutral

STANLEY	Description				£
1-47-329	Mini Multi Fine Tip Marker	Container	72	3253561473296	0.57

CARPENTER AND MASONS' PENCILS

STANLEY

- Rectangular graphite core (HB) for clear marking (1-03-850)
- Rectangular graphite core (type 4H) for clear marking (1-03-851)

STANLEY	Description				£
1-03-850	Red Carpenter Pencil	Blister	60	3253561038501	2.31
1-03-851	Green Mason Pencil	Blister	60	3253561038518	2.31

# CHALK LINES

FATMAX® PRO CHALK LINE

STANLEY  
FATMAX

On-board hook storage for convenience

Twisted polyester line with 50lb breaking strain for more abrasion resistance and longer life

Durable die cast aluminium housing for strength and durability

Quick gear release button allows line extension without crank rotation

5:1 gear ratio for quick rewind

Can be used vertically as a plumb bob

Integrated belt clip for convenience

Patented chalk view window to see exactly how much chalk you have left

FatMax® Quick Spike

Quickly secures chalk lines to most building materials

Height plunger with 2 depth settings for wide range of jobs (6mm & 13mm)

Durable and impact resistant construction

Hook retaining clip to lock line in place

Hardened steel pin maintains sharp point

STANLEY	Description				£
0-47-480	30m Pro Chalk Line	Carded	6	3253560474805	17.28
0-47-488	30m Pro Chalk Line & 225g Black Chalk	Carded	6	3253560474881	23.29
9-47-486	30m Pro Chalk Line & Quick Spike	Carded	6	3253560474867	25.72

FATMAX® CHALK LINE SET

STANLEY  
FATMAX

- 50lb breaking strain on line for longer life
- Large 45g chalk capacity
- Rubber over moulded case for strength and better grip
- High impact ABS case for durability
- Sliding door for quick and easy refill
- Metal crank folds into the case for ease of storage
- Clutch allows line extension without crank rotation
- Stainless steel end hook for added durability and rust prevention
- Patented chalk view window to see exactly how much chalk you have left
- 3.5 to 1 gear ratio rewinds 3 x faster
- Can be used vertically as a plumb bob

STANLEY	Description				£
0-47-681	30m FatMax® Chalk Line Set - 113g Blue Chalk & Fine Tip Black Marker	Carded	6	3253560476816	19.97

LARGE CAPACITY CHALK REEL

STANLEY

- Large capacity chalk line – holds 500g of chalk
- 45m twisted cotton line
- High impact ABS housing
- Rubber over moulding for impact protection
- 3:1 gear ratio – 3x faster than 1:1

STANLEY	Description				£
STHT0-47347	Large Capacity Chalk Reel	Carded	3	3253560473471	38.21

POWERWINDER CHALK LINE SET

STANLEY

- 3.5 to 1 gear ratio for 3.5 time faster rewind
- Clear view case so you can see the amount of chalk left inside
- Case holds 45g chalk to reduce filling times
- Stainless steel end hook does not rust
- Sliding door for quick and easy refill
- Metal crank folds onto the case for storage & ease of use
- Can be used vertically as a plumb bob
- Clutch allows line extension without crank rotation

STANLEY	Description				£
0-47-465	30m Powerwinder Chalk Line Set - 113g Blue Chalk & Level	Carded	5	3253560474652	18.06

METAL CHALK LINE

STANLEY

- Die cast aluminium case for durability
- Stainless steel end hook for added durability and rust prevention
- Metal case for strength and long life
- 30g chalk capacity
- Can be used vertically as a plumb bob

STANLEY	Description				£
0-47-100	30m Metal Chalk Line	Carded	6	3253560471002	11.61

CHALK LINE SET

STANLEY

- Kit contains 30m chalk line, 113g blue chalk and level
- High impact ABS case for durability
- Sliding door for quick and easy refill
- Stainless steel end hook does not rust
- 30g chalk capacity
- Can be used vertically as a plumb bob

STANLEY	Description				£
0-47-443	30m Chalk Line Set – 113g Blue Chalk & Level	Carded	5	3253560474430	8.62

COMPACT 9M CHALK LINE

STANLEY

- Less than ½ size standard chalk reels – but still as functional
- 9m precision line – ample for most applications
- 3.5:1 gear ratio – fast rewind
- 28g capacity – 50 lines per refill
- Can be used vertically as a plumb bob

STANLEY	Description				£
STHT0-47147	Compact 9m Chalkline	Blister Card	6	3253560471477	9.25

CHALK REFILL

STANLEY

- Powder specially formulated for good adhesion and high visibility
- Colour recommendations
- Blue: all round colour for interior and exterior use
- Red: for external masonry work, indelible
- White: for interior work such as carpet fitting

STANLEY	Description				£
1-47-403	113g Blue Chalk	Loose	12	3253561474033	3.46
1-47-404	113g Red Chalk	Loose	12	3253561474040	3.46
1-47-405	113g White Chalk	Loose	12	3253561474057	3.46

1-47-804	225g Red Chalk	Loose	12	3253561478048	4.59

# THE PRO'S ADVICE

## MAKE YOUR MARKING OUT TOOLS WORK HARDER

### COMBINATION SQUARE

#### Surface and edge preparation

**STEP 1** Plane the face of the wood and check that the surface is flat across its width and true along its length, then mark it with the traditional 'Face Side' mark.

**STEP 2** Plane the adjacent edge true, flat and square.

**STEP 3** Place the stock of the square on the face side surface and look to see if there is any light showing between blade and wood. Check the wood at several points down the length, make any fine adjustments with the plane and mark this edge with the 'Face Edge' sign.

From here on all marking with a square, bevel or marking gauge should be only from the face side or face edge.

### MARKING A LINE ON ALL FOUR FACES

This should be done with a knife for greater accuracy, plus it is easier to work to a cut line rather than a pencil line.

**STEP 1** To scribe a line across the face side, hold the stock tightly against the face edge of the wood using your thumb and three fingers. Your index finger should be against the inside edge of the square blade to prevent it from slipping when you press the knife against the outer edge to scribe the line.

**STEP 2** To score a line across the face edge, turn the square to place the stock against the face side, place the knife blade into the previous cut and slide the square blade up to the knife blade.

**STEP 3** Repeat this on the remaining two sides always ensuring that the stock is against the face side or face edge.

### TOP TIP

If several items of the same length are required, clamp them together and mark all at the same time.

### LARGE STEEL SQUARE SQUARES

These do not have a stock to hold against the work edge, so to position the square accurately use a spare piece of wood held against the edge and position the square against that.

### SLIDING BEVEL

These can be used for surface/edge preparation and marking out as the Try Square, but be careful when there are bevels at each end of a piece of wood. Always mark from the face side or face edge and check that the bevels are facing in the correct direction.

### IMPORTANT

Keep your chalk line free from moisture and for surfaces to be painted, check that the chalk does not 'bleed' through paint. When using near furnishings, check that the chalk does not stain fabrics or carpets.

### CHALK LINE

**STEP 1** Check that the case is well charged with chalk and give it a shake from time to time to ensure that the cord is well chalked. With a new line, draw the cord out to its full extent, pour in a small amount of chalk and rewind it. Complete filling when the cord is fully rewound.

**STEP 2** Anchor the end hook securely at one end of the piece to be marked.

**STEP 3** Draw out the chalked line and lock the crank handle into place and tension the cord.

**STEP 4** Place the cord carefully onto the correct position on the work. With finger and thumb lift the cord a few centimetres to create some tension and then allow it to 'snap' onto the surface to be marked.

**STEP 5** Rewind away from the marked line to avoid contaminating the work surface and line.

# LASER LEVELLING AND DETECTION

**ALL THE PRO'S WE TALKED TO WERE LOOKING FOR THE GREATEST ACCURACY FROM A LASER, BUT EASE OF USE IN ALL SITUATIONS BOTH INDOORS AND OUT, WAS ALSO SEEN AS VITAL. TO ACHIEVE THIS WE'VE USED IMPROVED TECHNOLOGY, PLUS WE OFFER THE ADDITIONAL SUPPORT THAT WAS REQUESTED WITH A COMPLETE NEW RANGE OF ACCESSORIES AND AN EXTENSIVE AFTER SALES SERVICE NETWORK.**

# THE PRO'S ADVICE

## THE RIGHT LASER TOOL FOR THE JOB

### THE 4 MAIN FUNCTIONS OF LASER TOOLS

Angles and slopes

Squaring

Plumb line – take a point from floor to ceiling

Horizontal & vertical levelling & alignment

### WHAT IS A LASER?

LASER stands for 'Light Amplification by Stimulated Emission of Radiation'. A diode is used to create a concentrated laser beam of light in one wavelength. The shorter the wavelength the brighter and more visible the laser beam. STANLEY lasers have a standard wavelength of 635 nanometers, which is suitable for use up to 300m.

### IP RATING

When working in dusty and damp conditions, the IP rating of the laser is also important. A selection of STANLEY lasers are rated IP54 (dust resistant and splash proof) or IP66 (dust resistant and completely waterproof).

### ARE LASERS POTENTIALLY HAZARDOUS?

Lasers are classed from 1 up to 4 in terms of potential hazard. STANLEY laser classes range from class I up to class IIM, which pose little or no hazard.

**Class I** – Poses no threat of biological damage.

**Class II** – The output could harm a person if they were to stare into a beam for a long period of time.

**Class IIM** – Lasers have a divergent beam and may be hazardous if an optical instrument is placed in front of the eye such as a magnifying glass.

### WARRANTY REPAIR AND CALIBRATION SERVICE

All STANLEY laser products are supplied with 1, 2, 3 or 5 year warranty, against deficiencies in materials and/or workmanship from the date of purchase. We advise that you have your STANLEY laser products serviced annually and calibrated every 6 months. If your product is malfunctioning within or outside the warranty period, you can get in touch with the After Sales Service Agent as listed. Our service agent can arrange collection throughout the country.

# FATMAX® LASERS

## FATMAX® LASERS RANGE OVERVIEW

**STANLEY  
FATMAX®**

### PULSE MODE

Cross Line / 360 Versions only

**LOCKING  
PENDULUM**

**DURABLE  
RUBBER  
OVERMOLD**

**IP54 RATED**  
Indoor and outdoor use

**CYCLE THROUGH  
DIFFERENT MODES**  
for battery efficiency

**FRONT  
MAGNETS**  
for drywall tracking  
placement

**1/4" & 5/8" THREAD  
COMPATIBLE**

## MULTI BRACKET OVERVIEW

**STANLEY**

Magnets on rear

Clamping functionality

Fine horizontal  
adjustment functionality

Built in stand

Fine adjustment wheel on underside  
for non 90 degree surfaces

Fine vertical adjustment functionality with lock

1/4" and 5/8" mounting thread on  
underside of bracket for use with tripods

Plumb beam projects through thread

Plumb beam cut out

Strap for attaching to pole / pipework

## FATMAX® 360° X 3 LASER – X3R & X3G

**STANLEY  
FATMAX®**

- X3R Red Beam Laser - 20m working range, extendable up to 50m with detector
- X3G Green Beam Laser - 35m working range, extendable up to 50m with detector
- Accuracy +/-3mm @10m
- Projects 3 x 360° lines
- Rated to IP54 to protect against dust and water splashes - Ideal for indoor and outdoor use
- Tough and rugged rubber over-mold housing – drop tested to 1m
- Powered by internal rechargeable Li-Ion Battery (supplied)
- Includes FatMax® Multibracket, Kitbox, charger, laser glasses, and laser grid target
- For more detailed specification please refer to the range table on page 54

STANLEY	Description				£
FMHT1-77357	FatMax® X3R Red Beam Laser	KitBox with Sleeve	2	3253561773570	448.70
FMHT1-77356	FatMax® X3G Green Beam Laser	KitBox with Sleeve	2	3253561773563	629.75

## FATMAX® 360° & 90° & PLUMB LASER – SLR-2V & SLG-2V

**STANLEY  
FATMAX®**

- SLR-2V Red Beam Laser - 20m working range, extendable up to 50m with detector
- SLG-2V Green Beam Laser - 30m working range, extendable up to 50m with detector
- Accuracy +/-3mm @10m (Spot Accuracy is +/-2mm @10m)
- Projects 360° Horizontal Beam & 2x Vertical Beams (for 90° angle) & a Plumb Beam
- Rated to IP54 to protect against dust and water splashes - Ideal for indoor and outdoor use
- Tough and rugged rubber over-mold housing – drop tested to 1m
- SLR-2V Red Beam Laser - Powered by 4xAA Alkaline Batteries (supplied)
- SLG-2V Green Beam Laser - Powered by 4xAA Rechargeable Ni-MH Batteries (supplied)
- Includes FatMax® Multibracket, Kitbox, charger (SLG-2V Green beam only), laser glasses, and laser grid target
- For more detailed specification please refer to the range table on page 54

STANLEY	DESCRIPTION				£

# STANLEY® LASER RANGE

## CROSS 360 LASER

STANLEY

- Cross 360 Red Beam Laser - 20m working range
- Cross 360 Green Beam Laser - 25m working range
- Accuracy +/-4mm @10m
- Projects a 360 horizontal beam and a vertical beam for a cross line
- IP50 Rated - Ideal for indoor use
- Self-Leveling
- 3 position lock switch with manual angle mode
- Powered by 4xAA Alkaline Batteries (supplied)
- Includes the NEW Stanley Bracket & Storage Pouch

STANLEY	Description				£
STHT77504-1	Cross 360 Red Beam Level	Blister	2	3253561775048	175.00
STHT77594-1	Cross 360 Green Beam Level	Blister	2	3253561775949	215.00

## CROSS 90™ LASER

STANLEY

- Cross 90 Red Beam Laser - 10m working range
- Cross 90 Green Beam Laser - 15m working range
- Accuracy +/-5mm @10m
- Projects a horizontal beam & 2x Vertical Beams (for 90° angle)
- IP50 Rated - Ideal for indoor use
- Self-Leveling
- 3 position lock switch with manual angle mode
- Powered by 2xAA Alkaline Batteries (supplied)
- Includes the NEW Stanley Bracket & Storage Pouch
- L3 have bracket & pouch

STANLEY	Description				£
STHT77502-1	Cross90™ Red Beam Laser	Blister	2	3253561775024	125.00
STHT77592-1	Cross90™ Green Beam Laser	Blister	2	3253561775925	175.00

## CUBIX LASER

STANLEY

- Cubix Red Beam Laser - 10m working range
- Cubix Green Beam Laser - 15m working range
- Accuracy +/-6mm @10m
- Projects a Cross Line
- IP50 Rated - Ideal for indoor use
- Self-Leveling
- 3 position lock switch with manual angle mode
- Powered by 2xAA Alkaline Batteries (supplied)
- Includes the NEW Stanley Bracket & Storage Pouch

STANLEY	Description				£
STHT77498-1	Cubix™ Red Beam Laser	Blister	2	3253561774980	69.49
STHT77499-1	Cubix™ Green Beam Laser	Blister	2	3253561774997	115.00

## SPL3 LASER

STANLEY

- SPL3 Red Beam Laser - 10m working range
- SPL3 Green Beam Laser - 15m working range
- Accuracy +/-3mm @10m
- Projects 3 Spot Beams (Up, Down & Front)
- IP50 Rated - Ideal for indoor use
- Self-Leveling
- 3 position lock switch with manual angle mode
- Powered by 2xAA Alkaline Batteries (supplied)
- Includes the NEW Stanley Bracket & Storage Pouch

STANLEY	Description				£
STHT77503-1	SPL3 Red Beam Laser	Blister	2	3253561773426	99.00
STHT77593-1	SPL3 Green Beam Laser	Blister	2	3253561775932	127.00

# LASER ACCESSORIES

## FATMAX® LASER LINE DETECTOR WITH CLAMP

**STANLEY**  
**FATMAX**

- Accuracy 1mm/m
- Can be used up to 30m
- Audible 20mm display screen
- 1-77-023 Designed for outdoor usage with a pulsating beam line laser
- 1-77-132 Designed for use with lasers with pulse mode for internal and external use
- 1-77-133 Designed for outdoor use with Rotating Lasers
- Green Beam Detector for use with The Green Beam Cross Line Laser

STANLEY	Description				£
1-77-023	Detector for Line Lasers	Box	1	3253561770234	106.29
1-77-132	Detector for Line Lasers	Box	1	3253561771323	106.29
1-77-133	Detector for Rotating Lasers	Box	1	3253561771330	106.29

## ROTARY LASER REMOTE CONTROL

**STANLEY**  
**FATMAX**

- Remote control for Rotating Lasers for use up to 40m away from the laser unit

STANLEY	Description				£
1-77-134	Remote Control	Box	1	3253561771347	31.20

## MAINS CHARGER

**STANLEY**

- Replacement charger for the Multiline (1-77-322) and Rotating Lasers

STANLEY	Description				£
1-77-127	Mains Charger	Box	1	3253561771279	43.50

## MULTI BRACKET

**STANLEY**

- Magnets on rear
- Clamping functionality
- Fine vertical adjustment functionality with lock
- Fine adjustment wheel on underside for non 90 degree surfaces
- Strap for attaching to pole / pipework
- Plumb beam projects through thread
- Fine horizontal adjustment functionality
- Plumb beam cut out
- Built in stand
- 1/4" and 5/8" mounting thread on underside of bracket for use with tripods

STANLEY	Description				£
FMHT1-77435	Multi Bracket	Box	2	325361774355	51.50

WALL MOUNTING BRACKET

STANLEY

- 5/8" thread fitting – fitted with channel mount and lock
- May be screwed to wall surface for ease of use
- Height adjustment via fine screw thread and graduation indicator

STANLEY	Description				£
1-77-172	Wall Mounting Bracket	Box	6	3253561771729	72.52

LASER GLASSES

STANLEY

- Laser Glasses designed to enhance the brightness of the laser line internally and externally
- Suitable for all lasers

STANLEY	Description				£
1-77-171	Laser Glasses Red	Box	1	3253561771712	14.50
STHT1-77367	Laser Glasses Green	Box	2	3253561773679	14.50

LASER GRID TARGET

STANLEY

- Laser grid target designed to enhance the brightness of the laser line internally and externally
- Suitable for all lasers
- Magnetic base for ease of use

STANLEY	Description				£
1-77-170	Laser Grid Target Red	Box	10	3253561771705	14.50
STHT1-77368	Laser Grid Target Green	Box	10	325361773686	14.50

MINI TRIPOD

STANLEY

- Can be used with lasers with 1/4" thread
- Folded flat, it can also be used with 5/8" thread
- Comes complete with magnet

STANLEY	Description				£
1-77-192	Mini Tripod	Box	20	3253561771927	14.50
1-77-128	Multi Line Laser Adapter 5/8"-1/4"	Box	1	3253561771286	7.44

CAMERA TRIPOD

STANLEY

- Can be used with lasers with 1/4" thread
- Adjustable height from 44cm – 119cm for convenience
- Compact and stable

STANLEY	Description				£
1-77-201	Camera Tripod	Box	10	3253561772016	28.98

ALUMINIUM TRIPODS

STANLEY

- 1-77-131 Aluminium Tripod: Can be used with lasers with 5/8" thread
- 1-77-163 Aluminium Tripod: Can be used with lasers with 5/8" thread – optical and rotating (When used with Multiline 1-77-322 requires 1-77-024 adapter). Extends from 97cm – 160cm in height
- 1-77-164 Aluminium Tripod: Can be used with lasers with 5/8" thread – optical and rotating (When used with Multiline 1-77-322 requires 1-77-024 adapter) Extends from 119cm – 292cm in height

STANLEY	Description				£
1-77-131	Aluminium Tripod	Box	1	3253561771316	86.99
1-77-163	Aluminium Tripod	Box	4	3253561771637	86.99
1-77-164	Aluminium Tripod	Box	4	3253561771644	203.07
1-77-024	Multi Line Laser Adapter 5/8"	Box	1	3253561770241	7.15

MEASURING STAFF

STANLEY

- Measuring staff designed to provide height and distance readings used in conjunction with optical levels, rotating lasers and line lasers
- 5m overall with 5 sections – graduated in cm and mm
- Strong, lightweight aluminium construction

STANLEY	Description				£
1-77-162	Measuring Staff	Box	10	3253561771620	62.38

3.6M EXTENSION POLE

STANLEY

- Can be used with lasers with 1/4" thread
- Extends up to 3.6m
- Can be used externally with tri-legs supplied

STANLEY	Description				£
1-77-022	3.6m Extension Pole	Box	5	3253561770227	106.29

GRADING ADAPTER

STANLEY

- Can be used with lasers with 1/4" and 5/8" thread

STANLEY	Description				£
1-77-168	Grading Adapter	Box	1	3253561771682	116.04

INFARED THERMOMETER

STANLEY

- Ideal for household thermal leak detection machinery and automotive, diagnostics, heating and aircon collaboration and checking
- Accuracy of +/-3 degrees - for extremely accurate measurements
- Emissivity 0,95, covers all thermal radiation emission of most materials
- IP 20 for dust protection
- Thermal leak detection - from a reference temperature (green screen), scanning an area will show: red screen for high temperature and blue screen for low temperature
- 8:1 spot ratio allows for users to measure a 32cm circle from 2,5m distance
- High contrast, backlit display - allows for visibility in all light conditions
- Temperature range of -38°C to 520°C - large range allows for users to effectively complete their desired tasks

STHT0-77403	S100 Sensor	Carded	4	3253560774035	18.30

MOISTURE DETECTOR

STANLEY

- Runs on 4 x AAA batteries (supplied)
- Measures masonry (mortar, concrete, plaster) moisture from 0.2% to 2.0% and wood moisture from 6% to 44%
- Measuring environment temperature
- Operating temperature 0 - 40° C
- Two detection pins (8mm length) to locate in material being tested
- Illumination LED
- LCD display indicating the moisture level on a bar graph
- Test sockets supplied in the cap
- Operates at 80% humidity

STANLEY	Description				£
0-77-030	Moisture Detector	Carded	2	3253560770303	32.50

Detects wood and metal studs for accurate working.

Detects live AC cables up to 51mm depth.

Detects stud edges for quick and accurate marking out.

Detects wood/ferrous and non-ferrous metals to various depths according to model.

Includes scan mode to quickly locate and identify materials with increased precision.

Detects stud centres for fast and precise location of suitable fixing points.

# KNIVES AND BLADES

# THE PRO'S ADVICE

CHOOSE THE RIGHT KNIFE, DO THE BEST JOB

### FIXED BLADE KNIVES

Designed for heavy applications and constant use. The rapid blade changing mechanism means you spend less time changing blades.

### RETRACTABLE BLADE KNIVES

These offer similar performance to the fixed blade models, but the blade can be retracted safely into the handle when not in use.

### SNAP-OFF BLADE KNIVES

The snap-off blade offers a constant sharp edge, but is also strong and thick enough to apply heavy pressure without the blade breaking.

### CRAFT, SPORT AND POCKET KNIVES

Handy pocket, craft and sports knives ideal for a wide variety of tasks.

### SAFETY KNIVES

Ideal for the warehousing environment. They include features such as auto retract and spring loaded blade technology to prevent injury when opening boxes, packaging and wrapping.

### SAFETY CUTTERS

Ideal for opening packaging with small, rounded ceramic safety blades.

# FIXED BLADE KNIVES

### FATMAX® PRO FIXED BLADE KNIFE

**STANLEY**  
**FATMAX**

**MAGNETIC NOSE**  
holds the blade in place while  
it's being changed

**HOLDS UP TO  
15 BLADES**  
for less refill time

**BIGGER THAN  
STANDARD**  
utility knives allowing work  
with gloved hands

**SUPPLIED WITH 10**  
heavy duty blades

**NO TOOLS REQUIRED**  
for blade changing for speed of use

**DIE CAST ALUMINIUM  
HOUSING**  
for strength and durability

# KNIFE BLADES

TUNGSTEN CARBIDE™ BLADES

STANLEY

SPEND LESS TIME CHANGING BLADES

- Blade stays sharper 10X\* longer
- Steel body allows flexibility to help to prevent breaking
- Laser deposited carbide lines edge delivering a long lasting blade for the job site

A BLADE THAT LETS YOU WORK LONGER

\*Than conventional blades

High Speed In-line Application Creates Durable and Long Lasting Edge

Tungsten Carbide Powder Deposited Through a High Powered Laser to the Blade Edge

Diamond Wheels Grind Angle onto Finished Carbide Blade

Having ONLY a Carbide Edge Allows Rest of Blade to Remain Flexible

- STANLEY® FATMAX® CARBIDE™ blades provide the durability needed to keep cutting through a variety of applications, including roofing, drywall, ceiling tile installation, and other construction materials that prove challenging for conventional blades
- Designed to deliver increased blade life, maintain first-cut sharpness and safeguard against snaps - three key factors that today's professionals demand
- Save time and money with fewer blade changes

\*Blade stays sharper 10X longer than traditional competitive blades.

STANLEY	Description				£

• Up to 50% longer life 25mm FatMax® Snap-off Blade\*

- Induction hardened edge gives sharper, longer lasting blade better value and less down time
- Normal duty general purpose blade ideal for paper, card, leather and most sheet materials
- 25mm blade for use in:
  - 10-820 25mm Xtreme™ Snap-off Knife
  - 10-486 25mm FatMax® Snap-off Knife
- 18mm blade for use in:
  - 10-481 FatMax® Snap-off Blade Knife with Cartridge
  - 10-418 DynaGrip® Snap-off Blade Knife
  - 10-018 InterLock® Snap-off Blade Knife
  - 10-380 Snap-off Blade Knife with Cartridge
  - 10-280 Snap-off Blade Knife – Self Locking
  - 10-151 SM Snap-off Knife

# SCREW DRIVERS

# THE PRO'S ADVICE

## THE RIGHT SCREWDRIVER FOR THE RIGHT JOB

**The first decision is which type of tip shape you require – Slotted, Phillips, PZ or Torx**

### SLOTTED – ideal for traditional cabinet making

For quality craftsmanship slotted screws still look the most attractive, particularly when the slots line up perfectly. Slotted screwdrivers are made with flared tips and parallel tips. For most work select a flared tip screwdriver, but you should select a parallel tip that is the same width as the screw slot, if you need to drive the screw below the surface of the wood without damage. Select a tip that matches the width of the screw slot, too wide and it will damage the work, too narrow and it may damage the screw slot.

### PHILLIPS & PZ – ideal for general joinery and construction

Phillips and PZ are popular in all forms of joinery and construction, and are now used universally and referred to by their point size, 1, 2, 3 or 4 PT.

The geometry of the screw recesses is different so avoid 'making do' with the 'wrong' screwdriver. The driving faces of the Phillips screw all taper down to the tip, whereas with PZ they are parallel which is designed to reduce 'Cam Out', the point when the screwdriver lifts out of the recess damaging the screw.

### TORX – ideal for maintenance and service engineers

This is the strongest and most wear resistant screw type most commonly found in machinery, cars and domestic appliances and commonly used for timber and decking screws.

### HANDLE

For maximum performance a screwdriver handle should be moulded to the bar, with a soft grip and a round smooth end cap, which offers comfort and improved grip to provide greater torque turning power.

### BAR AND TIP

Chrome vanadium steel provides a strong, corrosion resistant bar. Sand blasted tips have a fine texture, which provides an even more secure grip in the slot or recess as the harder steel of the tip 'bites' into the softer screw. Bolster screwdrivers provide hardened tips for durability and reduced wearing. Precision machined for excellent head to fastener fit. Stainless steel screwdrivers providing a chrome vanadium steel bar resisting bending and snapping.

## MAKE YOUR SCREWDRIVERS WORK HARDER

### USE THE RIGHT SCREWDRIVER FOR POWER AND DURABILITY

Although you can get away with using a PZ screwdriver with a Phillips screw and vice versa, it should be avoided. Using the wrong driver can cause cam out and damage both the screw and the screwdriver.

The two main cross-head types have very different profiles. Choosing the right screwdriver is crucial for:

- Extending tool life
- Protecting screw patterns
- Transmitting maximum torque without wear, particularly with difficult fasteners

Each screwdriver has a colour coded end to help you choose the right screwdriver.

- Yellow for PHILLIPS® screwdrivers
- Blue for PZ screwdrivers
- Red for Flared/Parallel screwdrivers
- Green for Torx screwdrivers
- A pictogram of the pattern is also shown on the side of the handle.

### BIGGER HANDLES = MORE TORQUE

For really stubborn fasteners, larger handled soft grip screwdrivers work best as they allow maximum purchase. For these fasteners selection of a heavy duty driver is essential as poor quality screwdrivers can chip or round when under high loads. And remember to use the right bit pattern. PZ for PZ and Phillips for Phillips. Always use the biggest slotted blade that the fastener and position will allow.

### MULTIBIT SCREWDRIVERS – MORE FASTENERS, LESS BULK

For maintenance on the go multibit screwdrivers – ratchet or fixed – make life easier as they allow you to carry a variety of bit patterns without the bulk of carrying a whole screwdriver set. Choose a multibit that has internal storage – usually in the handle – for even more convenience and fewer lost bits.

### BRADAWL – FOR QUICK SCREWDRIVING WITHOUT POWER TOOLS

When driving screws straight into soft timber without a pilot – use a bradawl to mark an indent where the screw needs to be driven. This will make sure the screw goes exactly where you want it to.

### USE VDE WHEN WORKING ON OR NEAR LIVE CIRCUITS

VDE (verband der elektrotechnik) screwdrivers and pliers are insulated to protect against electric shocks. STANLEY FatMax VDE Screwdrivers are individually tested to 10000v.

### USE A RATCHET SCREWDRIVER

Ratchet screwdrivers make tightening screws faster and easier. Choose a screwdriver with a solid mechanism that will cope with high torque loads. Top end professional ratchet screwdrivers – like the FatMax® Xtreme™ – have tough, ultra fine mechanisms and come with a range of interchangeable bits to suit all fastener types.

# SCREWDRIVERS

## FATMAX® DIAMOND TIP

**STANLEY  
FATMAX®**

**COLOUR CODED ENDS**  
for easy identification of the "right"  
screwdriver for each screw type

**MORE GRIP  
BETTER BITE\*  
50% LONGER LIFE\***

**HANDLE MOULDED**  
direct to bar virtually unbreakable bond.  
Highly reliable and providing an extra long life

**CHROME VANADIUM  
STEEL BAR**  
allows for high torque and reduces  
the chance of tip breakage

**BLACK PHOSPHATE  
COATED BAR**  
for superior corrosion  
resistance providing  
ultimate product life

**LARGE  
DIAMETER**  
Tri Material handle offers  
great torque needed for  
driving wood screws

**SOFT GRIP HANDLE**  
perfect balance between great  
grip and reduced fatigue

**NARROW WAIST**  
for fast spinning action and more control

**TIP IDENTIFICATION**  
for easy identification of the "right"  
screwdriver for each screw type

**DIAMOND TIPS**  
give ultimate screw grip and longer life.  
This is achieved by creating better friction  
between the screwdriver and fasteners  
reducing cam-out and stripped screws.

FATMAX® STAINLESS STEEL SCREWDRIVERS

STANLEY  
FATMAX

- Full stainless steel bars for added corrosion resistance both on the screwdriver and prevents extraneous rust forming on the screw itself
- Vacuum quenching guarantees mechanical characteristics and resistance to corrosion
- Bacteriological tests passed after sterilisation in autoclave 20 min at 120°C, 1 bar over-pressure

Applications for stainless steel tools

- Industries sensitive to contamination: agro-food, clean rooms, laboratories, medical facilities
- Rust-prone outdoor environments: marine environments, buildings (door and window fasteners, terraces)

You need to use stainless steel screwdrivers to preserve the anti-rust characteristic of a stainless steel screw

- Standard screwdrivers produce metal particles which rust and contaminate stainless steel fasteners
- Using a stainless steel screwdriver is the only way to guarantee non-contamination of the fastener and high resistance to corrosion

# RATCHET & MULTIBIT SCREWDRIVERS

## FATMAX® RATCHET SCREWDRIVER SETS

**STANLEY**  
**FATMAX**

- Fine 45 tooth ratchet offering very high torque (x3 human strength for tightening)
- Large soft grip handle with bit storage for added comfort and convenience
- 3-position ratchet enables clockwise, anti-clockwise and locked ratcheting positions
- Specific models also include:
  - FMHT0-62688: Stubby ratchet for small confined spaces
  - FMHT0-62689: LED lights for easy working in dark areas
  - FMHT0-62690: Full sized standard model
  - FMHT0-62691: Pistol grip design for higher torque

FMHT0-62688

STANLEY	Description				£
FMHT0-62688	FatMax® Stubby Ratchet Screwdriver with 6 bits	Carded	6	3253560626884	17.86
FMHT0-62689	FatMax® LED Ratchet Screwdriver with 12 bits	Carded	6	3253560626891	23.42
FMHT0-62690	FatMax® Ratchet Screwdriver with 12 bits	Carded	6	3253560626907	21.57
FMHT0-62691	FatMax® Pistol Grip Ratchet Screwdriver with 12 bits	Carded	6	3253560626914	23.07

## MULTI-BIT RATCHET SCREWDRIVER

**STANLEY**

- Magnetic head for efficient holding and rapid changing of the bit
- Bit storage cartridge for easy access
- Tri-lobular bi-material handle for maximum torque comfort
- 3 position ratchet enables clockwise, counter clockwise and locked ratcheting positions
- Supplied with 10 insert bits of popular sizes

STANLEY	Description				£
0-68-010	Multibit Ratchet Screwdriver +10 Bits	Carded	6	3253560680107	16.74

## 10-WAY FLEXI SCREWDRIVER SET

**STANLEY**

- 10 Replaceable 1/4" bits and adapter
- Comfortable bi-material handle
- Bit magazine with belt clip

STANLEY	Description				£
0-62-508	10-Way Flexi Screwdriver Set	Carded	4	3253560625085	16.74

**Set contains:**  
Phillips PH1, PH2, PH3  
Torx T15, T20  
Square 1, 2  
Flared 4mm, 5mm, 6mm

## STUBBY RATCHET MULTIBIT SCREWDRIVER

**STANLEY**

- High quality ratchet mechanism for fast operation
- Bi-material handle gives extra grip
- Magnetic bit retention to prevent lost bits
- Secure handle bit holder
- Accepts standard 1/4" hex screwdriver bits

STANLEY	Description				£
0-66-358	Stubby Ratchet Multibit Screwdriver	Carded	3	3253560663582	7.43

**Set contains:**  
Flared 5mm, 6.5mm  
Phillips PH1, PH2  
Torx T15, T20

FATMAX® CLIP-N-GRIP™ SCREWDRIVER

STANLEY  
FATMAX

- Integral Clip-n-Grip™ holding system allows one handed use
- Grippers can be disengaged to be used as a standard bit holder
- Includes 6 chrome vanadium bits with internal bit storage for easy access
- Large soft grip handle gives comfort and high torque
- Magnetised bit holder for quick tip change
- Hardened and tempered bar for long life

STANLEY	Description				£
9-69-188	FatMax® Clip-n-Grip™ Screwdriver + 6 Bits	Carded in counter top merchandiser	12	3253569691883	15.81

6-WAY RATCHET SCREWDRIVER

STANLEY

- Ratchet screwdriver with rotation control switch for quick operation
- 6 Replaceable 1/4" bits
- Comfortable bi-material handle
- Bit stored in the handle for convenience

STANLEY	Description				£
0-62-509	6-Way Ratchet Screwdriver	Carded	4	3253560625092	13.47

Set contains:  
Flared 5mm, 6.5mm  
Phillips PH1, PH2  
Torx T15, T20

6 WAY SCREWDRIVER

STANLEY

- All in one screwdriver
- Built in bolster allows additional leverage
- Supplied with Phillips 1 and 2, 2 x slotted and 2 nut drivers (1/4" and 5/16")
- Tri lobular bi-material handle for torque and comfortable grip

STANLEY	Description				£
0-68-012	6 Way Screwdriver	Carded	6	3253560680121	5.15

Set contains:  
Hex drive 6mm, 8mm  
Parallel 4.5mm, 6mm  
Phillips PH1, PH2

4 IN 1 POCKET DRIVER

STANLEY

- Non-slip textured surface won't slip, crack or peel
- Magnetic bits attract and holds small screws
- 2 double-ended bits (1/8" slotted/Phillips #1, 1/16" slotted/Phillips #00)
- S2 tool steel hardened for maximum durability
- Soft bi-material grip for convenience and comfort

- Precision die cast for strength and durability
- Aluminium gear wheel both long lasting, strong and lightweight
- 3 jaw chuck for greater versatility

STANLEY	Description				£
0-03-105	105 Single Pinion Hand Drill 8mm	Carded	6	3253560031053	20.73

# SAWS

# THE PRO'S ADVICE

## THE RIGHT SAW FOR THE JOB

### SIZE AND NUMBER OF TEETH

Choosing a saw is all about selecting the right size and type of saw teeth for a particular job. Tooth size is measured in the number of complete teeth to the inch (tpi). Larger and fewer teeth give a faster cut, whereas a greater number of smaller teeth provide a finer finish.

The table below is a quick guide to show which size of saw teeth best suits different requirements, plus the number of teeth and suggested applications is listed in the features shown with all the saws on the following pages.

### TOOTH TYPE

Saws with induction hardened blades – or hard point – have been through a process whereby the teeth of the saw have been hardened, giving a more durable cutting edge, while retaining flexibility.

Saws with triple ground teeth have a different tooth geometry. They are designed to cut on both the push and pull stroke, making them 50% faster than a standard double ground saw.

### SAW APPLICATION

### SAW TEETH REQUIRED

#### CONSTRUCTION WORK

Construction carpentry, joists, stud framing, chipboard

#### LARGE TEETH

7 teeth per inch

#### FINISH WORK

Architraves and mouldings panelling, flooring, PVC

#### SMALL TEETH

11 teeth per inch

#### SPECIALIST WORK

Flooring, PVC pipes and mouldings, plasterboard and drywall panels, cellular concrete

#### SPECIALLY DESIGNED SAWS

With different numbers and types of teeth to suit specific tasks

# SAWS

A great time saving feature of STANLEY® saws is that the handles can be used to mark out both 45° & 90° angles.

## FATMAX® HEAVY DUTY AND FINE FINISH SAWS

### STANLEY FATMAX

**BI-MATERIAL HANDLE**  
screwed and ultrasonically welded for comfort and security

**3 SIDED PRECISION GROUND TEETH**  
offer razor sharp cutting edges at every stage of the stroke

**TEETH ARE PRECISION SET**  
to generate clearance of kerf for the blade to cut on both the forward and back stroke, increasing cutting efficiency by 30%

**INDUCTION HARDENED TEETH**  
stay sharper twice as long than previous model

**“ THIS SAW IS hardcore! I HAVE BEEN USING IT FOR WEEKS NOW AND IT IS STILL GOING LIKE I JUST TOOK THE SLEEVE OFF ”**

NIALL MORRIS, BUILDER

STANLEY  
FATMAX

- 8 teeth per inch – ideal to cut through plasterboard
- Triple bevelled toothing for 50% quicker, easier cutting
- Secure locking mechanisms in 3 positions (90°, 135°, 180°) for maximum flexibility and increased leverage for corner and ceiling cuts
- Soft grip handle for added comfort
- Fold away blade storage for safety

3 IN 1 SAW

STANLEY

- Multi-Purpose 3-in-1 Saw Set offers 3 different blades in one space saving design
  - universal pull saw blade, metal saw blade and compass saw blade
- Anti-slip ergonomic bi-material handle for optimum user comfort
- The turn knob allows blades to be easily changed and they can be tilted into 6 different positions
- The main blade utilises a pull saw tooth configuration which is less likely to jam or bend while in use
- 250mm / 10" aggressive tooth 11 teeth per inch universal wood saw blade cuts on the "pull" stroke – perfect for general woodworking and pruning
- 200mm / 8" compass saw blade 9 teeth per inch for more detailed work
- 150mm / 6" metal hacksaw blade 24 teeth per inch for cutting metal pipes and rods

STANLEY	Description				£
0-20-092	3 in 1 Saw	Carded	2	3253560200923	16.78

FATMAX® 10" REVERSIBLE FLUSH CUT SAW

STANLEY  
FATMAX

- 13 teeth per inch
- Spring-loaded pin allows blade to be reversed to cut from left or right position
- Steel back prevents bending for strong, true, straight cuts
- Wide blade for precise cutting such as dovetails, small joints and cut-offs
- Reversible handle provides improved access in close quarters
- New soft grip handle for comfort and support

RAKER TOOTH BOW SAW BLADE

STANLEY

- Swedish quality steel blade for long life
- Raker teeth clear out the waste – ideal for 'green' timber
- Extra hardened toothing to ensure a rapid cut and longer life
- The teeth are arranged to avoid any vibration and a clean cut

STANLEY	Description				£
1-15-446	610mm Raker Tooth Bow Saw Blade	Loose	10	3253561154461	5.40

# THE PRO'S ADVICE

## MAKE YOUR SAWS WORK HARDER

### MARK THE CUT WITH A KNIFE

For a tear free cut use a knife to mark the line all round the wood rather than a pencil.

### CUT WITH FINISHED SURFACE UPWARDS

Always use a sharp saw with the finished surface of the work upwards so that any fraying will be on the hidden underside, very important when cutting plywood or veneered boards.

### CUT ON THE WASTE SIDE OF THE LINE

For a precise fit it is a good idea to leave a little additional waste that you can plane off afterwards if necessary.

### STARTING THE CUT

Start the cut at the edge furthest from you with the saw cutting edge angled at approximately 30° to the work surface. Use the thumbnail of the hand not holding the saw, or a scrap piece of wood, position the cutting edge to the waste side of the line. The first stroke should be a light pull to establish the cutting line (kerf).

### SAWING OFF A THIN PIECE OF WOOD

To help prevent the thin piece splitting off you can clamp a piece of scrap to the far edge extending beyond the piece to be cut, which will support the saw blade and ensure a clean cut.

### SAWING TECHNIQUE

As a general rule the coarser the teeth the higher the angle you should saw at, for a 7 teeth per inch hand saw start at 30° and raise angle to between 45° and 60°. For an 11 teeth per inch hand saw start the cut at 30° and raise angle to 45°. When using a back or tenon saw start at less than 20° and as the kerf extends to the full width of the wood lower the blade until almost horizontal. To help keep the saw on line hold the handle with three fingers and thumb with the index finger resting on the outside face of the handle to provide alignment. Maintain a firm but relaxed grip on the handle. Keep wrist, elbow and shoulder in line with the saw blade and the marked line. You should also align your head and eye to be in line with the cut. Use the full length of the saw in steady unhurried strokes. The rate of cut can be increased by dropping the handle as the blade is about halfway through the stroke, lift the handle for the draw stroke.

### CORRECTING ALIGNMENT

If the saw starts to move off line slow down, make slight changes to your position and progressively steer the cutting edge back into alignment. Make regular checks to ensure that the cut is progressing square to the top surface.

### FINISHING THE CUT

As you near the completion of the cut the sound made by the saw will change to indicate that it is time for you to support the piece that is being cut off. If you leave this too long the weight will cause it to break off damaging the work.

# MITRE BOXES

## MITRE BOX WITH SAW

### STANLEY

- Cuts a variety of angles: 90°, 45°, 22-1/2°, and 45° bevel
- Patented cam lock clamping system holds workpiece securely in place and keep boards securely in place while cutting
- Rubber feet help hold unit in place and prevent box slippage
- Foldable legs allow box to sit flat on floor or work table or be butt up against a corner
- Extended flange allows the box to be securely clamped to your work surface
- Saw storage on the side of the box
- Contoured radius side wall improves user grip and comfort

STANLEY	Description				£
1-20-600	Mitre Box with Saw	Loose	6	3253561206009	24.07

## MITRE BOX

### STANLEY

- One piece injection moulded mitre box for strength and durability
- Patented cam lock clamping system holds workpiece securely in place
- Built in saw stop to prevent damaging the mitre box
- 90°, 45° and 22½° angles and 45° scarf cut guide

STANLEY	Description				£
1-20-112	Mitre Box	Loose	6	3253561201127	15.67

## ADJUSTABLE MECHANICAL MITRE BOX

### STANLEY

- Precision die cast base
- Specially hardened and tempered replaceable blade with extra fine universal teeth
- Blade tensioning screw for easy blade replacement and to ensure a clean accurate cut
- Smooth action saw support and guide system
- Easily changed to 30°, 45°, 60° or 90° cut angles
- Adjustable length gauge for repeat cuts
- Comfort grip elastomer inserts in handle
- Rapid clamping of workpiece using moveable cam locks

STANLEY	Description				£
1-20-800	Adjustable Mechanical Mitre Box	Loose	2	3253561208003	54.21
1-20-809	Replacement Blade for Adjustable Mechanical Mitre Box	Carded	100	3253561208096	5.42

SAW STORAGE MITRE BOX

STANLEY

- Lightweight, high impact ABS plastic mitre box for strength and durability
- Complete with tenon saw
- Holes in base for fastening to work bench
- 90°, 45° and 22½° angles and 45° scarf cut guide
- Front lip butts up against workbench to prevent slippage in use

STANLEY	Description				£
1-19-800	Saw Storage Mitre box (with Saw)	Loose	8	3253561198007	16.24
1-19-212	Saw Storage Mitre box (without Saw)	Loose	8	3253561192128	6.60

FATMAX® HACKSAW

STANLEY  
FATMAX

- Thumb grip for accuracy
- 5" cutting capacity
- Supplied with bi-metal blade (24 teeth per inch)
- 90° blade location and 45° flush cut
- Durable die cast aluminium body both lightweight and strong
- Bi-material soft grip for comfort
- Adjustable thumb dial tension mechanism inside handle
- Spring loaded blade tension device gives 150kg blade tension for ease of use

STANLEY	Description				£
1-20-531	430mm FatMax® Hacksaw 24 TPI	Carded	2	3253561205316	25.98

HEAVY DUTY HACKSAW

STANLEY

- 2 blade positions: 90° and 45°
- 136 kg permanent blade tension – faster cutting
- Patented quick blade change and lever to change tension suitable for application
- Bi-material ergonomic frame and handle for superior comfort and grip
- Easy tension memorisation and adjustment using a tightening wheel
- Steel frame for long life
- Locking and unlocking of the blade by a patented lever

STANLEY	Description				£
1-20-110	300mm Heavy Duty Hacksaw 24 TPI	Carded	2	3253561201103	24.07

300MM COMPOSITE HACKSAW

STANLEY

- Soft grip bi-material handle for comfort
- Reduced weight and resistant to shocks
- Quick easy blade changing
- Constant tension of 70kg
- No adjustment required when changing the blade

STANLEY	Description				£
2-15-892	300mm Composite Hacksaw 18 TPI	Carded	6	3253562158925	12.03

ENCLOSED GRIP HACKSAW

STANLEY

- Solid steel frame for strength and long life
- Screwed moulded black handle to ensure virtually unbreakable bond with blade
- Blade tension system allows quick fine adjustment for wider range of applications
- Directable blade 4 positions for a vertical and horizontal cut
- Supplied with HSS blade

STANLEY	Description				£
1-15-122	300mm Enclosed Grip Hacksaw 24 TPI	Carded	5	3253561151224	11.19

HACKSAWS

FATMAX® 5 IN 1 HACKSAW

STANLEY  
FATMAX

- 5 positions, uniquely versatile:
  - 45° flush-cut position
  - 90° standard position
  - Long pad saw position
  - Short pad saw position
  - Low profile position
- Lightweight frame with 150kg blade tension
- Integrated storage for replacement blades
- Comfort grip handle

THE PRO'S  
ADVICE

MAKE YOUR HACKSAWS WORK HARDER

PREPARATION

Clamp the workpiece securely in an engineer's vice. When cutting existing pipe work, ensure that water or gas has been safely turned off. When cutting thin sheet metal it is a good idea to sandwich it between two pieces of plywood for support. If the blade snaps in the middle of a cut restart the cut at the far edge to prevent the slightly thicker blade from jamming in the cut.

THE RIGHT BLADE AND TENSION

Select a blade with a tooth count that will ensure that at least three teeth are in contact with the metal being cut all the time. Take time to set the blade tension correctly, too soft and the blade may snag and break. Cut at a low angle to help create a smooth free flowing cut. Use a new blade when cutting brass to minimise the risk of blade slip to prevent the slightly thicker blade from jamming in the cut.

CUTTING METAL TUBING

This requires a fine-toothed blade at least 24 TPI. Commence the saw cut until the blade penetrates through the pipe wall. Continue to cut on the nearer wall of the pipe for a smoother vibration free cut, do this by rotating the pipe away from you.

CUTTING THICK ROD

When cutting thick rod or bars mark the cutting line all the way around. Make your first cut to the depth of the blade on the upper surface. Rotate the steel towards you and again cut to the depth of the blade. Continue until the cut is completed.

FINISHING THE CUT

With all types of cut support the waste material as you near the completion of the cut.

# CHISELS, PLANES AND SURFORM

“ ABSOLUTELY EXCELLENT!  
THIS CHISEL IS A BRILLIANT  
PRODUCT. VERY HEAVY DUTY  
WON'T SPLIT WHEN HIT WITH A  
STEEL HAMMER ”

FATMAX® FOLDING POCKET CHISEL

STANLEY  
FATMAX

- 25mm carbon steel blade – most popular size – holds a good edge
- Steel strike cap – can be used with a steel hammer
- Folds to fit in the pocket – ideal for job site work, prevents blade damage and trouser cutting

Product video can be viewed at [www.stanleytools.co.uk](http://www.stanleytools.co.uk)

DIAMOND SHARPENING STONE

STANLEY

- Course and smooth grits for precise sharpening
- Suitable for a range of general sharpening tasks including knives, chisels, scissors, shears etc
- Complete with storage case

STANLEY	Description				£
STHT0-16144	Diamond Sharpening Stone	Card	4	3253560161446	14.91

# THE PRO'S ADVICE

## MAKE YOUR CHISELS WORK HARDER

### VERTICAL PARING

**STEP 1** Vertical paring is the means of cutting wood, across the grain, with the chisel in an upright position using hand power or light striking with a mallet. This skill is important in cutting parts of most commonly used wood joints and for trimming material back to a cut line. Take particular care when paring with the grain, as there is strong possibility of splitting.

**STEP 2** Secure the work to the bench with a C clamp taking care to place a piece of scrap material between the work piece and the bench to avoid damage.

**STEP 3** For the right handed user hold the chisel blade in a pen-hold grip, index finger at the front with the back of the blade supported by the third finger and thumb resting on the left hand edge of the blade around 25mm back from the cutting edge, or in a position that also enables the little finger and edge of the hand to rest on the work piece. The left hand grips the handle with the thumb uppermost.

**STEP 4** Aim to remove only a very small amount of material at each pass of the chisel; depending on the hardness of the wood and the sharpness of the chisel you should remove no more than 0.5 to 1.0mm at each cut.

**STEP 5** If you are cutting back to a knife marked line, ensure that you hold the chisel perfectly vertically and always lever forward away from the marked line to ensure that the defined edge of the cut is not bruised or rounded over. To add a little more power to the cut push down on the end of the handle with the right shoulder.

**STEP 6** Finally when there is no more than 0.5mm to remove place the widest chisel available in the knife cut and apply pressure vertically until you reach the bottom of the cut. If you attempt to cut too much at this stage there is a risk that the chisel will be forced back over the line.

### HORIZONTAL PARING

**STEP 1** Horizontal paring is the technique of removing waste material once the limits of the cut have been defined by either sawing or vertical paring with a chisel. By following this procedure the risk of damaging splits is minimised.

**STEP 2** Secure the work in a vice or clamp to the bench.

**STEP 3** For the right-handed person grip the handle of the chisel with the end tucked into the palm of the right hand and the thumb and index finger on either side of the handle. The right hand applies the power to the cut. Tuck your elbow into your side to give you more controlled power.

**STEP 4** The left hand controls the precision of the cut either by placing the four fingers of the left hand on top of the blade and the thumb underneath, or for very fine work place the thumb on top and index finger of the left hand underneath close up to the cutting edge.

**STEP 5** Before making any horizontal cut across or down the grain always ensure that you have sawn down to depth before you start to remove the waste material. To minimise the risk of splitting at the far edge of a through housing it is a good technique to work in from both sides to the middle.

**NOTE:** Take care when setting out your cutting lines to use a knife cut or a gauged line, this is more accurate than a pencil line.

**TIP 1** If you have to strike the chisel it is much better to use a mallet than a hammer, because the larger striking face of the mallet can be brought down on the end of the handle without having to look at it, leaving you to concentrate on what the cutting edge is doing.

**TIP 2** With only a few exceptions the chisel should be used with the bevel facing upwards or away from the user.

**TIP 3** If you need to use a mallet when making a series of vertical cuts position the work over the leg of the bench to minimise vibration and to work more effectively.

**TIP 4** Resist clamping the work in a vice unless you have supported the underside. Do not be tempted to use a hammer or mallet on wood held in the vice.

**TOP TIP** Drill out waste material from deep mortises before 'cleaning up' with a chisel.

# THE PRO'S ADVICE

## THE RIGHT PLANE FOR THE JOB

### TRY PLANE, JOINTER/FORE PLANE

Ideal for truing the long edges of timber in readiness to join the edges together to produce a wide board as for a tabletop. The long plane sole bridges all of the high spots on the timber and ensures that these are removed first. The cutter must be absolutely square across its width.

### JACK PLANE

The best choice for stock removal and preparation of timber from the sawn condition. To function properly the cutter is honed to a slight convex shape between 0.5 and 1mm at its maximum for rapid stock removal.

### NO 4 SMOOTHING PLANE

Perfect for producing a fine finish to the surface, particularly if you are working in a hardwood with interlocking grain, that is when the structure flows in both directions and is roughed up by the plane at the same time as it is being smoothed just a few millimetres to the side. Its compact size also makes it a good general-purpose plane for trimming and fitting on the job site, but it tends to follow the undulations of the timber and so cannot be used to create true long surfaces.

### BLOCK PLANES

Designed to accurately plane end grain. In this situation with a bench plane the cutter tends to vibrate or 'chatter', which can mark the surface, whereas with a block plane the vibration is reduced because the cutter works with the bevel uppermost. The range of 5 planes differs mainly in the type of adjustment offered. STANLEY's top two products are fully adjustable for depth of cut, cutter alignment and mouth aperture, an often-overlooked feature but which is critical to controlling the fineness of the cut. Other block planes in the range will work just as efficiently as the fully adjustable models but you will need to take more time to adjust them manually.

### THE LOW ANGLE BLOCK PLANE

This is the best specialist end grain plane and it is also perfect for trimming the edges of decorative laminate; although you will need to hone the edge more frequently.

### DUPLEX REBATE PLANE

So called because of the two cutter positions (standard and bull nose), it is designed to produce rebates.

## MAKE YOUR PLANES WORK HARDER

### HOW TO USE A BENCH PLANE

**STEP 1** Fix the wood securely either against a bench stop on the bench top or in the bench vice.

**STEP 2** For right handed person adopt a firm base with your left foot well forward and your right foot and right hip as close to the line of cut as possible. If you are right handed, hold the front knob in your left hand finger tips and grasp the rear handle with the right hand with the index finger resting on the shoulder of the cutter; this helps maintain consistent direction, particularly important when squaring edges.

**STEP 3** Place the toe (the base of the plane in front of the mouth) on the near end of the wood and apply light downward pressure to maintain even contact with the wood. Push the plane forward with your right hand and transfer your body weight from right foot onto the left foot as the plane progresses. When the toe approaches the far end of the wood reduce the downward pressure with the left hand and increase the pressure with the right hand until the mouth and cutter are clear of the wood. This is a very important skill to acquire as the consequence of rocking the plane at the start and finish of the stroke will be a rounded surface.

**STEP 4** At the end of each stroke it is better to lift the plane and return to the starting position rather than drawing it back over the wood, which could possibly dull the cutting edge prematurely.

### HOW TO USE A BLOCK PLANE

When planing end grain always work to a cut line, which is extended around all four faces to minimise fraying. Remember that if you attempt to plane a full width of end grain you are very likely to split a piece off the far edge of the wood, to eliminate this risk plane in from both ends.

### HOW TO USE A DUPLEX REBATE PLANE

**STEP 1** Set the width of the rebate and set the depth of the required cut.

**STEP 2** Start planing from the far end of the rebate and progressively work back to the near end. As you push the plane forward apply pressure on the heel with the right hand this will reduce the tendency for the cutter to 'dig in'.

**TIP 1** It often helps to place the fingers of the left hand on the outer edge of the fence to help keep the plane in a perfectly upright position. For best result aim to produce a thin shaving as the absence of a cap iron to control the shaving demands more care from the user to produce a good result.

**TIP 2** If you need to clean up a stopped rebate move the cutter and lever cap to the forward bull nosed position. Depth adjustment will have to be done by hand as the lever function is not available in the forward position.

# PLANES

The STANLEY® range of planes covers all your likely needs and they all feature the finest hardened, tempered and precision ground chrome carbon alloy steel cutters. As a general guide the longer and wider the plane the truer the surface along the length of the timber will be.

## STANLEY

### NO 7 BAILEY BENCH PLANE – JOINTER

STANLEY

- Professional fully adjustable metal plane
- For accurate truing of long edges for jointing wide boards edge to edge
- 60mm blade width

STANLEY	Description				£
1-12-007	560mm No 7 Bailey Bench Plane	Box	1	3253561120077	137.92

### NO 62 BAILEY LOW ANGLE JACK PLANE

STANLEY

- One-piece base and frog virtually eliminate chatter and increase accuracy
- Patented lateral adjustment locking feature
- Ductile iron castings for weight and durability
- Iron is made from extra thick 3/16" A2 steel for superior edge retention
- Cherry wood handle and knob for comfort
- Mouth adjustment for different types of wood

STANLEY	Description				£
1-12-137	No 62 Bailey Low Angle Jack Plane	Box	1	3253561121371	155.07

### NO 6 BAILEY BENCH PLANE – FORE

STANLEY

- Professional fully adjustable metal plane
- For stock removal and truing up long edges or levelling wide boards
- 60mm blade width

STANLEY	Description				£
1-12-006	460mm No 6 Bailey Bench Plane	Box	1	3253561120060	121.03

### NO 5 BAILEY BENCH PLANE – JACK

STANLEY

- Professional fully adjustable metal plane
- General purpose for rapid stock removal prior to commencing assembly work
- 50mm blade width

STANLEY	Description				£
1-12-005	355mm No 5 Bailey Bench Plane	Box	1	5000366120058	79.10

NO 4 PREMIUM BENCH PLANE

**STANLEY**

- Base and frog cast as one to reduce chatter
- Precision machined base flat to .003" for accuracy
- Thicker blade 3mm to reduce chatter
- Blade made of A2 steel for increased edge retention, stays sharper for longer
- Ductile cast iron withstands drops from workbench
- Heavier body for increased performance
- Cherry wood FSC wooden handle and knob for comfort
- Solid brass adjustments for smooth operation
- Patented lateral adjustment locking feature for easy adjustment
- 50mm blade width

STANLEY	Description				£
1-12-136	No 4 Premium Bench Plane	Box	1	3253561121364	134.31

NO 4 BAILEY BENCH PLANE – SMOOTHING

**STANLEY**

- Professional fully adjustable metal plane
- General purpose bench plane for workshop, site or fine finishing
- 50mm blade width

STANLEY	Description				£
1-12-004	245mm No 4 Bailey Bench Plane	Box	1	5000366120041	66.44

NO 4½ BAILEY BENCH PLANE – SMOOTHING

**STANLEY**

- Professional fully adjustable metal plane
- General purpose bench plane for workshop, site or fine finishing
- 60mm blade width

STANLEY	Description				£
1-12-045	260mm No 4½ Bailey Bench Plane	Box	1	76174120455	74.24

NO 3 BAILEY BENCH PLANE – SMOOTHING

**STANLEY**

- Professional fully adjustable metal plane
- General purpose bench plane for workshop, site or fine finishing
- 45mm blade width

STANLEY	Description				£
1-12-003	240mm No 3 Bailey Bench Plane	Box	1	5000366120034	74.00

HANDYMAN BENCH PLANE

**STANLEY**

- 1-12-204 for workshop, site or finishing work
- 1-12-205 for rapid stock removal prior to commencing assembly work
- 50mm blade width

STANLEY	Description				£
1-12-204	245mm Handyman Bench Plane	Box	1	3253561122040	46.72
1-12-205	355mm Handyman Bench Plane	Box	1	5000366122052	64.21

SINGLE IRON BENCH PLANE

**STANLEY**

- Light duty, easy and simple to adjust smoothing plane
- 45mm blade width

STANLEY	Description				£
1-12-033	210mm Single Iron Bench Plane	Box	1	5000366120331	26.74

9½ FULLY ADJUSTABLE BLOCK PLANE

**STANLEY**

- Small professional fine grey iron
- Fully adjustable for depth of cut, cutter alignment and mouth opening
- For end grain and general purpose fine finishing work
- Comes with pouch for convenient storage
- 40mm blade width

STANLEY	Description				£
5-12-020	160mm Fully Adjustable Block Plane	Clam	1	3253565120202	64.40
0-12-331	Spare Iron for 12-020 and 12-220 Block Planes for original pattern	Loose	6	3253560123314	9.22
0-12-508	Spare Iron for 12-020 and 12-220 Block Planes for current pattern	Loose	6	3253560125080	9.22

60½ BLOCK PLANE LOW ANGLE FULLY ADJUSTABLE

**STANLEY**

- Fully adjustable fine grey iron
- Comes with pouch for convenient storage
- Low angle cutter
- For end grain and plastic laminates
- 35mm blade width

STANLEY	Description				£
5-12-060	150mm Low Angle Fully Adjustable Block Plane	Clam	1	3253565120608	62.26
0-12-504	Spare Iron for 12-060 Block Plane for current pattern	Loose	6	3253560125042	9.22

220 ADJUSTABLE BLOCK PLANE

STANLEY

- Small professional fine grey iron
- Adjustable for depth of cut and alignment
- 40mm blade width
- Iron needs to be honed before use

STANLEY	Description				£
1-12-220	180mm Adjustable Block Plane	Clam	1	3253561122200	46.19

BLOCK PLANES

STANLEY

- Manually adjustable
- General purpose ideal for model makers, craft and all light duty jobs
- 140mm has 35mm blade width
- 180mm has 40mm blade width

STANLEY	Description				£
1-12-102	140mm/102 Block Plane	Clam	1	3253561121029	21.81
1-12-116	180mm/110 Block Plane	Clam	1	3253561121166	33.18
0-12-330	Spare Iron for 12-116 Block Plane	Loose	6	3253560123307	7.69

RB5 REPLACEABLE BLADE BLOCK PLANES

STANLEY

- Lightweight die-cast modelling plane with machined base
- Blade can be positioned for standard use or bull nose for working in corners
- Adjustable for depth of cut
- Spare blades stored safely in handle
- 50mm blade width

STANLEY	Description				£
0-12-105	150mm Block Plane	Clam	2	3253560121051	16.86

## LAMINATE EDGE TRIMMER

### STANLEY

- Twin blades and spring loaded for trimming both sides of edging strip in one sweep
- Suitable for thin laminates, veneers and edge banding
- Spring loaded for adjustable cuts from 1/2" – 1"

STANLEY	Description				£
STHT0-16139	Double Edge Laminate Trimmer	Card	2	3253560161392	11.91

# SURFORM

## SURFORM METAL BODY PLANER FILE

**STANLEY**

- Polypropylene handle and die cast alloy body for strength and durability
- Can be set in two positions to be used as either a plane or a file
- Fitted with replaceable standard cut blade

STANLEY	Description				£
5-21-122	310mm Surform Metal Body Planer File	Carded	2	3253565211221	20.59

## SURFORM METAL BODY PLANE

**STANLEY**

- Polypropylene handle and die cast alloy body for strength and durability
- Fitted with replaceable standard cut blade

STANLEY	Description				£
5-21-296	315mm Surform Metal Body Plane	Carded	2	3253565212969	17.25

## SURFORM METAL BODY FLAT FILE

**STANLEY**

- Strong heavy-duty metal body with rear removable robust handle in yellow polypropylene
- Knurled thumb grip for precision
- Accepts all types of 250mm blades for versatility
- For use with push or pull action depending on direction of blade installation

STANLEY	Description				£
5-21-295	440mm Surform Metal Body Flat File	Carded	2	3253565212952	15.72

## SURFORM ROUND FILE

**STANLEY**

- For enlarging holes and shaping tightly curved surfaces
- Tough polypropylene handle for strength and durability
- Fitted with replaceable blade
- Thumb grip for comfort and ease of use

STANLEY	Description				£
5-21-297	400mm Surform Round File	Carded	2	3253565212976	11.41

## SURFORM METAL BODY BLOCK PLANE

**STANLEY**

- Strong heavy-duty metal body for strength and durability
- Fitted with replaceable fine cut blade ideal for edges and confined work spaces
- Thumb screw for quick blade release – no tools required

STANLEY	Description				£
5-21-399	153mm Surform Metal Body Block Plane	Carded	2	3253565213997	11.08

## SURFORM MOULDED BODY PLANE

**STANLEY**

- Lightweight plastic moulded body for strength and durability
- Fitted with replaceable standard cut blade ideal for general purpose use
- Thumb screw for quick blade release – no tools required

STANLEY	Description				£
5-21-103	270mm Surform Moulded Body Plane	Carded	6	3253565211030	12.02

# DEMOLITION HAMMERS & COLD CHISELS

# THE PRO'S ADVICE

## THE RIGHT DEMOLITION TOOL FOR THE JOB

### WRECKING BARS

Heavy duty demolition tools constructed from spring steel for extreme strength and durability. Precision ground edges provide better access with wider prying edges. They also weigh less than traditional pry bars.

### WONDER BARS

Extremely useful prying, nail pulling and levering tools in a wide range of sizes.

### DEMOLITION & RIPPING BARS

Forged hook and claw ended bars capable of undertaking the heaviest of demolition jobs.

### PRECISION PRY BARS

Shorter bars for close work, including some with extra wide levering surfaces to spread the load, which enable you to carefully lever off existing mouldings and trim with minimal collateral damage. These are perfect tools for the kitchen fitter and interior decorator.

# DEMOLITION TOOLS

Demolition or 'refurbishment' is a major part of the construction industry. Ripping out of kitchens and bathrooms etc, is a daily activity, which is why STANLEY® has created a comprehensive range of specialist tools to meet every requirement.

## FATMAX® SPRING STEEL WRECKING BARS

**STANLEY**  
**FATMAX**

FATMAX® SPRING STEEL WONDER BAR® PRY BARS

STANLEY  
FATMAX

- Spring steel construction for lightweight power and durability
- Wider prying edges for better load spread
- Sharpened pointed prying claws for easy access to sunken nails

STANLEY	Description				£
1-55-516	FatMax® 15" Spring Steel Wonder Bar® Pry Bar	Box	4	3253561555169	11.78

SUPER WONDER BAR® PRY BAR

STANLEY

- Patented, arched centre gives more swing during nail pulling – no need for a wood block
- Heat treated, forged high carbon steel for increased durability
- Powder coated finish
- Contoured bar makes pulling nails, prying and lifting easier
- Polished and bevelled cutting edges for easy lifting and ripping
- Polished tips and bevelled nail slots for high performance

STANLEY	Description				£
1-55-525	380mm / 15" Super Wonder Bar® Pry Bar	Loose	4	3253561555251	11.97

WONDER BAR® PRY BARS

STANLEY

- Heat treated, forged high carbon steel for increased durability
- Powder coated finish
- Contoured bar makes pulling nails, prying and lifting easier
- Polished tips and bevelled nail slots excellent for pulling nails, lifting or prying

21" Wonder Bar

STANLEY	Description				£
1-55-515	340mm / 14" Wonder Bar® Pry Bar	Loose	4	3253561555152	9.83

- Quality chrome vanadium steel
- Quenched & tempered to precise specifications for added safety

STANLEY	Description				£
4-18-294	Masons' Chisel 45mm X 215mm / 1 3/4" X 8 1/2"	Carded	3	3253564182942	9.56
4-18-297	Brick Set 100mm X 215mm / 4" X 8 1/2"	Carded	3	3253564182973	12.32

# THE PRO'S ADVICE

## MAKE YOUR MASONS' COLD CHISELS WORK HARDER

### CUTTING BRICKS, BLOCKS & NATURAL STONE

For bricks or blocks make a light cut on every face with a brick set and club hammer, then complete the cut with firmer blows on the brick set until the cut is completed cleanly. When cutting natural stone with cold chisels avoid making heavy cuts in the middle of the stone, as the result is likely to be a complete shattering of the stone. Make light cuts carefully at the edges with the chisel angled away from the body of the stone.

### SAFETY

- Wear safety glasses and gloves when using any demolition tool or masonry chisel
- Use a hammer with a striking face twice the diameter of the chisel head

### REMOVING CERAMIC TILES

Masons' chisels are ideal for removing ceramic tiles from walls and floors. With the chisel edge at a slight angle between the tile and the floor or wall, a sharp blow from a club hammer should be enough to break it free.

# ENGINEERS' COLD CHISELS & PUNCHES

## COLD CHISELS & PUNCHES

STANLEY

3pce Cold Chisel Kit

6pce Punch Kit

12pce Punch & Chisel Kit

STANLEY	Description				£

- Hardened and tempered alloy steel for durability
- Milled body for accuracy
- Square head with chamfered polished points

STANLEY	Description				£
0-58-120	3.2mm x 101mm Square Head Centre Punch	Carded	6	3253560581206	3.58

# THE PRO'S ADVICE

## THE RIGHT HAMMER FOR THE JOB

### ANTI-VIBRATION HAMMERS

In all cases, especially where it is intended to use a hammer for prolonged periods, you should choose an Anti-Vibration hammer, which virtually eliminates all vibration.

### HIGH VELOCITY HAMMERS

By using revolutionary design and manufacturing techniques, STANLEY has created a range of hammers that although light in weight, deliver a blow equal to, or more than their heavier counterparts, leading to less fatigue, reduced risk of RSI's and greater striking accuracy.

### CLAW HAMMERS

There are two types of claw hammer, the ripping or straight claw and the joiners or curved claw. The ripping claw is ideal for pulling up floorboards or ripping out unwanted studwork, whilst the curved claw is better for pulling nails.

The striking face should be fully hardened and slightly convex to resist wear, whilst the outer circumference of the head should be 'rim tempered' (slightly less hard) in order to minimise the possibility of small fragments flying off, if struck against an even harder surface.

Look carefully for a claw that is precision ground on the outer facing edges. The claw must be hardened and preferably tempered in oil to create a tougher structure that will bite into the shank of a nail and also resist fracture. The true test of a quality claw hammer is its ability to pull a nail by gripping the shaft, not by hooking under the head of the nail.

### MAGNETIC NAIL HOLDER

The magnetic nail holder on the FatMax hammer is invaluable when you want to insert a nail in a hard to reach position where it is just not possible to hold the nail in your hand.

### USE THE RIGHT WEIGHT OF HAMMER

Choosing the right weight is important, because there is no benefit in lifting a 22oz hammer to drive nails no longer than 50mm. In the same way a 16oz hammer will make heavy work in driving a 75mm nail. As a reasonable compromise a 20oz claw hammer is a good general-purpose choice.

### CROSS PEIN HAMMERS

The Warrington cross pein is a much lighter hammer available in weights from 6oz to 12oz and the cross pein is useful in starting the nail off. For very fine panel pins choose the pin hammer, which has a longer handle and smaller diameter striking face.

### BALL PEIN

These hammers are used mainly in engineering and automotive applications. The ball pein end has several functions, but mainly used for swaging rivets.

### CLUB & DRILLING HAMMERS

This should be your only choice if you intend to strike a cold chisel. The striking face of the hammer must be larger than the chisel to be struck, otherwise there is a serious risk of injury from flying metal splinters.

# CLAMPS AND PLIERS

# THE PRO'S ADVICE

## THE RIGHT CLAMP FOR THE JOB

### FATMAX TRIGGER CLAMP

This offers the easiest and fastest adjustment and is ideal for clamping material to the bench, for holding components together during gluing, plus by reversing the jaws it can be used for spreading surfaces apart in a safe and controlled way.

### BAND CLAMP

A 4.5m nylon band that can be used to clamp any shape. Two clamps used in combination with rigid bars makes a very powerful, large capacity carcase clamp. No tools are required to tension the clamp.

### "G" CLAMPS

Forged from heavy duty malleable iron for extra strength. They are for use in similar situations to 'F' clamps, but where higher clamping loads are needed. The 100mm and 150mm are the most useful sizes.

### CORNER CLAMPS

Suitable for one corner to be clamped at a time. They offer the advantage of being able to be clamped to the workbench so that both hands are free to make final adjustments.

# CLAMPS & VICES

### FATMAX® XL TRIGGER CLAMP

#### STANLEY FATMAX

#### DURABLE RESIN BODY

Engineered glass filled nylon body for toughness and strength. Ribs for added performance. Resists relaxation during clamping

#### REMOVABLE SOFT JAW PADS

Deep jaw pads allow clamping close to the bar for even pressure when holding or gluing

#### REVERSIBLE JAW

Push button tool free release allows fast conversion to a spreading tool

#### RELEASE TRIGGER

Die cast ergonomic trigger to allow ease of release against high clamping force

#### HIGH LEVERAGE HANDLE

Steel core for high clamping force, allows up to 270kg to be applied

#### STEEL I-BEAM 'BACKBONE'

Cold rolled steel. Heat treated and case hardened

# THE PRO'S ADVICE

## MAKE YOUR CLAMPS WORK HARDER

### DO A DRY RUN

Before 'gluing up' even the simplest of structures it is always good practise to have a 'dry run' to be sure that all the joints fit well and that the clamps are adjusted to require only minimal tightening and adjustment when you have everything glued.

### TAKE CARE IN POSITIONING CLAMPS

Ensure that the clamping force is through the line of the joint and that the clamp is square to the material.

### SPREAD THE CLAMPING LOAD EVENLY

When clamping up wide carcasses put a rigid piece of wood between the clamping pads. It's even better if the wood is slightly convex, because this will spread the effect of the clamp more evenly across the joint and ensure a better finish. The best way to do this is to hold the two pieces of wood in position with a small 'G' or 'F' clamp leaving both hands free to accurately position the large bar clamps.

### TIGHTEN THE CLAMPS PROGRESSIVELY

Depending on the complexity of the job you could be working with four, or even eight bar clamps at the same time, so your aim is to bring all the joints together at the same moment, without any undue stress to the job.

### CHECK THE CLAMPED JOB IS SQUARE

Once you have closed up all the joints, the best way to check that the job is square is to measure the diagonals with a steel rule. Alternatively, use two thin pieces of wood sharpened to an edge and stretched across the diagonals of the frame. Mark a line across the two pieces of wood and then compare the diagonal dimension across the other corners. You should be able to make any minor adjustments required by slightly changing the position of the clamps.

### HOW TO JOIN WIDE BOARDS

For gluing together wide boards edge to edge (rubbed joint) adjust the opening to include the protective scrap of wood and lay the clamps on the bench or floor. Place the glued boards on top of the steel bars of the clamps with scraps of paper protecting the steel bars from the glue. You should only need light pressure. If the size of the job requires more than two clamps alternate with one on the upper side. As you apply the pressure check that the boards remain flat on the bars of the clamps; if they don't it probably means that the edges are not square.

### USING CLAMPS TO OPEN JOINTS

A very important feature of many clamps in the range is the ability to turn the clamping heads around and use the clamp to push surfaces apart. Often when testing joints on a dry run they may stick too well. To separate them with a hammer could cause damage, but with our clamps you can reverse them, which enables you to open the joints in a controlled way.

# THE PRO'S ADVICE

## THE RIGHT PLIERS FOR THE JOB

### COMPOUND ACTION PLIERS

Compound action pliers use technology similar to that found in bolt croppers and aviation snips. A double pivot gives a massive mechanical advantage meaning user input is multiplied – giving more cutting and gripping force for the same input. These are ideal for cutting thicker wires and cables and can also benefit users with an impaired gripping action.

### WIRE CUTTING

Pliers do not cut by shearing, as scissors do, they cut wire by partially cutting and finally 'separating' the wire. The cutting edges should be precision ground, but the actual edge should be filed flat to separate rather than cut.

### COMBINATION PLIERS

For gripping and cutting these are indispensable and should be found in every tool box. The 180mm long model is probably the most versatile.

### DIAGONAL AND END CUTTERS

For wire cutting only. The FatMax® models are made to demanding DIN / ASO / ANSI and are capable of cutting hard steel wire. The end cutter can exert a higher leverage than the diagonal and is easier if you have a lot of repetition cutting of hard wire.

### STRAIGHT AND CRANKED LONG NOSE PLIERS

The long gripping nose is rounded and very useful for twisting electrical wire to make good contacts. Long nose pliers also have a cutting edge suitable for copper and fine gauge soft steel. The 160mm model is compact and easy to use.

### VDE RANGE

Offers additional safety in electrical applications with 1,000v rated handles, safe live line working, with handles tested up to 10,000v.

### WATER PUMP PLIERS

Featuring adjustable jaw capacities, they are ideal for plumbing when it comes to working on large size flange nuts. The specially fluted jaw profile also helps grip piping securely.

### SLIP JOINT PLIERS

A general purpose gripping tool with smaller adjustable jaw capacities than Water Pump Pliers, but with the added feature of a wire shear built into the jaw. A very useful and adaptable tool for any toolbox.

### 'MOLE' LOCKING PLIERS

Available with straight and curved jaws suitable for locking onto flat surfaces such as nuts and bolts or metal bars.

# PLIERS

## FATMAX® MULTIUSE 6-IN-1 COMBINATION PLIER

**STANLEY**  
**FATMAX**

### UNIVERSAL CUTTING EDGE

Designed to cut wires up to and including 2.0mm piano wire with up to 20% less force required to cut

**BI MATERIAL HANDLES**

### WIRE STRIPPER

Strips 2.5mm<sup>2</sup>, 4mm<sup>2</sup> & 6mm<sup>2</sup> wire

- Bolt Croppers – two dimensions of bolt cropper to cut M3 & M4 bolts, threaded for an accurate cut
- Reamer – hardened reaming edge to smooth pipework burrs
- Induction hardened, drop forged steel with hardened cutting edges for durability

### WRENCH FEATURE

Multi-point grip to tighten nuts and bolts with a hexagonal head

REVOLVING HOLE PUNCH PLIERS

STANLEY

- Ideal for arts and crafts, paper, card, leather belts and fabric
- Different hole diameters: 2-3, 3-3, 5-4, 5-5
- Durable chrome finishing
- Ergonomic handle to allow strong force without the possibility of palm fatigue
- Locking trigger for safety
- Bolt pinion for durability

STANLEY	Description				£
STHT0-75044	Revolving Hole Punch Pliers	Carded	1	3253560750442	10.91

# BOLT CROPPERS, NIPPERS & PINCERS

## BOLT CROPPERS

**STANLEY**

- Drop forged chrome molybdenum steel jaws for durability and strength
- Performance & efficiency: will cut 10mm thick steel
- Machined cutting edges gives clean and fast cut
- Forged handles lightweight but very strong
- Soft grip handle for comfort
- Quick adjusting screws for precise work

STANLEY	Description				£
1-95-563	350mm/14" Bolt Croppers	Loose	1	3253561955631	59.33
1-95-564	450mm/18" Bolt Croppers	Loose	1	3253561955648	75.51

## FATMAX® PRO END NIPPERS

**STANLEY**  
**FATMAX**

- Long lever arm and pivot pin closer to jaws maximises cutting power
- Machined cutting edges gives clean and fast cut
- Convex shaped handle allows quick rotations for faster repetitive cuts
- Double heat treatment (60-62 HRC) for long life and sharpness
- Will cut 4.5 mm soft wire and 1.6 mm of hard wire

STANLEY	Description				£
9-95-097	FatMax® 220mm Pro End Nippers	Counter Top	12	3253569950973	32.35

## END NIPPERS

**STANLEY**

- High grade alloy steel for long life
- Induction hardened cutting edges to maintain 1st cut sharpness
- Conforms to ISO 9242 and DIN 5242 standards

STANLEY	Description				£

# SNIPS

## FATMAX® ERGO SNIPS

**STANLEY**  
**FATMAX**

### IMPROVED PIVOT BOLT DESIGN

Increased durability. The new low profile design helps with restricted access whilst improving strength

### RE-DESIGNED HANDLE SPAN

Less risk of injury

### JAW RE-DESIGN FOR A BETTER FINISH

One serrated edge for grip & one smooth edge for an over-all cleaner cut and finish

### RE-DESIGNED LATCH DESIGN

Easy to open/close

### THE NEW ERGONOMICALLY CERTIFIED GRIP AREA

Improved safety and reduced strain

# SOCKETS, SPANNERS AND WRENCHES

# THE PRO'S ADVICE

## THE RIGHT SOCKETRY FOR THE JOB

### SOCKETS

Sockets are available in either hex (6 points) or bi-hex (12 points). The bi-hex socket provides greater access when the nut is in a hard to reach position. The hex socket, although with reduced angular accessibility, tends to be able to withstand heavier duty use.

Maxi Drive profile sockets are the most efficient and offer protection to both the fastener and the socket wall by taking the driving force away from the extreme corners of the nut where there is the greatest risk of damage.

Sockets are available in standard length, for most general purpose applications and deep drive, which come into their own if you need to tighten a nut on longer screw studs.

### RATCHETS

The turning force on the socket is imparted by the drive handle through a square recess forged into the end of the socket. The size of this recess varies depending on the size of the socket – 1/4" 3/8" or 1/2" square drive. Specific sets for each drive size are available, together with sets that combine drive sizes, which enable you to deal with fastenings from 4mm up to 32mm.

FatMax® and MicroTough™ ratchets offer the smoothest operation and allow access to fasteners in restricted areas. The smaller head is 20% – 30% smaller than standard ratchet heads and the fine tooth mechanism offers a 5° angle of engagement.

When working with oily hands it is important that the ratchet handle incorporates a quick socket release facility.

# SOCKET SETS & ACCESSORIES

### FATMAX® 1/2", 3/8" & 1/4" RATCHET

**STANLEY  
FATMAX**

72 tooth ratchet mechanism gives 5 degree minimum working arc for use in confined areas  
Professional ratchet with small head size for ease of access

Laser etched markings for easy identification

Maxi Drive socket profile for improved grip and longer fastener life

Premium black chrome finish gives double the corrosion protection

Bi-material handle for comfort and grip

Fully ISO compliant for proven performance

### MICROTOUGH™ 1/2", 3/8" & 1/4" RATCHET

**STANLEY**

- MicroTough™ professional ratchet features a quick release two way ratchet with a 20-30% smaller pear shaped head, smaller than conventional ratchets for easy access in tight spaces
- Fine tooth ratchet gives 5° angle of engagement smoother operation and continues to function even where access to fastener is very restricted
- Fully polished chrome plated finish for durability and rust resistance
- Hex sockets feature Maxi Drive wall profile for improved grip on fastener
- DynaGrip bi-material handle for comfortable grip

STANLEY	Description	☑	☒	📦	£

# THE PRO'S ADVICE

## MAKE YOUR SOCKET SETS WORK HARDER

### NUTS SHOULD TURN SMOOTHLY

To effectively use sockets you need to be sensitive to the way in which the nut turns on the bolt or screw stud. If the nut does not rotate smoothly check to see that the thread is not 'crossed' or if the thread size or type differs from the bolt.

### USE THE RIGHT SIZE SOCKET

Even though the socket may locate on a nut that is slightly smaller, the result may be that the corners of the fastener will be deformed and make future removal difficult. The size of the ratchet handle is also carefully matched to a given set of socket sizes so that damage to the fastening is minimised. Whenever possible pull the ratchet handle towards you for better control.

### TAKE CARE NOT TO OVER TIGHTEN

Run the nut up until finger tight and then apply the socket to finally tighten the nut. Under normal conditions do not be tempted to over tighten fastenings.

### LOCKING EXTENSION BAR

If you need to work on a fastener beyond your normal reach a locking extension bar will enable you to reach the nut without the risk of leaving the socket embedded in the machinery or engine compartment.

### USE A TORQUE WRENCH FOR EXACT SPECIFICATIONS

If the torque required to complete the fastening needs to be specific for functional or safety reasons you should use a torque wrench.

# THE PRO'S ADVICE

## CHOOSE THE RIGHT WRENCH FOR THE JOB

### COMBINATION SPANNERS

These combine in a single tool an open-ended jaw and a ring, both have the same dimension. The open-ended jaw is offset by 15° which enables the operator to turn any nut provided there is even a very small amount of access. The Bi-Hex (12 point) Ring-end is also cranked at 15° from the horizontal, which enables you to grip the handle without risking injury to the knuckles.

### OPEN-ENDED SPANNERS

Both ends of these spanners are open with the heads set at 15°. The open-ended format is ideal for working on pipelines where only side access is possible. Select slim open-ended jaws to give greater accessibility within the thickness of the fastener.

### ADJUSTABLE WRENCH

This must be used carefully and sparingly if damage to the fastener is to be avoided, but it is still a very useful item for any toolkit.

### COMBINATION SPANNER WITH RATCHETING RING END

A very useful specialist set of 6 spanners, with the benefit of a ring end which ratchets with a 5° angle of engagement, so that you can work in very restricted spaces and have the added advantage of an open ended end profile to work on fastenings that do not have 360° access, as occurs on pipe work.

### ACCELERATOR COMBINATION SPANNER

The open-end part of the tool incorporates an innovative jaw form which enables the user to engage and disengage without removing the spanner from the nut.

# WRENCHES & SPANNERS

## COMBINATION WRENCH SETS

### STANLEY

- Re-usable plastic rack for easy storage
- Nickel chrome plated for corrosion protection
- Maxi Drive ring ends for increased grip and reduced fastener damage
- Forged from chrome vanadium steel to ISO 3318 and DIN 3113 for proven performance

STANLEY	Description				£
4-94-646	6 Piece Combination Wrench Set	Plastic Clip	2	3253564946469	29.52

MAXI DRIVE™ PLUS COMBINATION WRENCHES

STANLEY

- Fully forged from chrome vanadium steel to ISO 3318 and DIN 3113 standards of accuracy and performance
- Nickel chrome plating protects against corrosion
- Slim pattern combines maximum strength with optimum accessibility
- Maxi Drive open ended jaw shape maintains grip on fastener with only slight rotational pressure
- Bi-hex 12 point ring with precisely broached Maxi Drive profile to increase the grip by up to four times
- Improved grip even on damaged nuts
- Polished head with satin finish to the handle
- Both the open ended head and the ring are angled at 15° for optimum accessibility

- 1) The unique shape of the jaws locks the spanner onto the nut  
2) With this locking, the risk of ill-timed loosening is almost completely removed  
3) Locking is applied to the faces of the nut, preventing the risk of slipping

# THE PRO'S ADVICE

## MAKE YOUR WRENCH WORK HARDER

### COMBINATION WRENCHES

The open-ended jaws of a spanner are for use where access is restricted or when fasteners are in line as in pipework. Use the ring-end of a spanner for initial loosening and final tightening where access is available, because it offers maximum strength and grip to reduce the risk of damage to the nut.

### NEVER USE EXCESSIVE FORCE

When freeing a 'frozen' or 'rusted on' nut never use a hammer or extend the length of the spanner by using a piece of pipe; you will damage both the spanner and the fastener, instead use a lubricating oil.

### PULL TOWARDS YOU WHEREVER POSSIBLE

Whether tightening or freeing off a fastening you can apply more power and control by pulling the spanner toward you and if it accidentally slipped off the nut there is less risk of injury.

### ADJUSTABLE WRENCHES

For best performance from an adjustable wrench avoid selecting an oversized wrench for the fastener. Close the jaws of the wrench onto the flats of the nut and then gently move the wrench forward and back at the same time further tightening the adjusting knurled wheel until the fit to the nut is without movement; this will minimise damage to the fastener. Always rotate so that the force is directed toward the fixed jaw.

### SAFETY

- Never use a hammer for additional leverage
- Don't use open-ended spanners or adjustable wrenches to free off a 'frozen' nut or to finally tighten a nut; use a ring spanner instead
- Keep spanners free from oil to prevent slippage

LOCATING & GAINING A GOOD GRIP TO TURN HEX KEYS CAN BE A PROBLEM FOR PRO'S, ESPECIALLY IN TIGHT ACCESS SPACES. TO MAKE IT EASIER OUR LATEST DEVELOPMENT HAS LONGER KEYS WITH A UNIQUE 3 POSITION LOCK - 90°, 135°, AND 180°. THIS COMBINATION OF FEATURES PROVIDES BETTER REACH AND THE EASY GRIP HANDLE ALLOWS YOU TO APPLY GREATER TORQUE

# THE PRO'S ADVICE

## MAKE YOUR FASTENING TOOLS WORK HARDER

### STAPLERS AND TACKER

**TIP 1** Choose the best staple type for the job. If you want to remove it later select the shortest that is suitable, if it is to be permanent select a longer staple. Set the power to Hi or Low setting and test on a scrap piece.

**TIP 2** If the staples are to be visible it is good practice to try to keep them in alignment and an equal distance apart – for accurate spacing it's a good idea to make a gauge.

**TIP 3** If you are stapling fragile materials that have a distinct structure like wood veneer, always position the staple across the grain for greater strength. With some thin materials, even on low power, the staple may tend to cut through and become ineffective. Change to a broad crown staple or add a piece of stronger material between the staple crown and the work piece.

**TIP 4** When work is completed fire off one final staple and hold the handle in the closed position and place the wire loop over the plastic hook on the handle to hold the handle in the closed position for storage.

### DUAL MELT GLUE GUNS

**TIP 1** Be sure to select the best heat setting for the job. Wood, plastics and metals respond best to a high temperature setting while more delicate materials such as card, paper and fabric bond better on low heat. If the materials have a tendency to absorb heat rapidly, a higher setting ensures that the glue stays fluid long enough for the parts to be positioned accurately.

**TIP 2** When in use always stand the gun on a piece of scrap material – even with great care the hot glue will drip.

**TIP 3** Test the glue by squeezing gently, aim to produce a fine and consistent line of glue – squeeze too hard and it will all appear in a single blob.

**TIP 4** Do not attempt to apply glue to a very large area as it will cease to be workable after about 30 seconds.

**TIP 5** Once glue has been applied hold the two pieces for about 30 seconds, by which time a strong bond will have formed.

**TIP 6** As soon as the glue stick disappears into the heating chamber insert another to maintain a continuous flow of glue.

### HAND RIVETERS

**TIP 1** Assess the length, diameter and type of rivet required dependent on material type, thickness and final application (visual or functional). As a rule of thumb the rivet should be one and a half times longer than the combined thickness of the materials being joined.

**TIP 2** Clamp the two sheets together and drill through both at the same time, removing any burrs with a fine file. Test suitability before starting on the finished material.

**TIP 3** Insert the rivet and ensure that it is seated firmly onto the outer surface. If the materials to be joined may be damaged by the force of the rivet closing, place a suitably sized washer over the rivet shank to spread the pressure and create a stronger join.

**TIP 4** Fit the correct size of nosepiece to the riveter and place over the rivet mandrel, pushing it up to the head of the rivet. Squeeze the handles together for the first pull, maintaining pressure on the nose of the riveter at all times. Open the handles and press the nose down to the rivet a second time, squeezing the handles together again, until the steel mandrel snaps just below the finished rivet.

# PLUMBING, AND DRYWALL TOOLS

# PLUMBING TOOLS

## PIPE SLICES

**STANLEY**

- Durable cast metal body for a longer working life
- Ridged profile for additional grip
- Automatic wheel tension for fast, clean cuts on 15 & 22mm pipe
- No adjustment needed

STANLEY	Description				£
0-70-445	Pipe Slice 15mm	Card	6	3253560704452	15.25
0-70-446	Pipe Slice 22mm	Card	6	3253560704469	17.88

## ADJUSTABLE PIPE CUTTERS

**STANLEY**

- Adjustable to cover a range of pipe sizes
- Durable metal construction
- Steel guide rollers for accuracy
- Built in deburring tool (70-448 only) for a clean cut edge
- Replacement cutter wheel in handle

STANLEY	Description				£
0-70-447	Adjustable Pipe Cutter 3-22mm	Card	6	3253560704476	10.72
0-70-448	Adjustable Pipe Cutter 3-30mm	Card	6	3253560704483	14.31

## PLASTIC PIPE CUTTERS

**STANLEY**

- Cuts up to 28mm plastic pipe – can also be used for hose, conduit and edge trim
- Precision stainless steel blade
- Durable moulded resin body

STANLEY	Description				£
0-70-450	Plastic Pipe Cutter	Card	6	3253560704506	15.48

## BASIN WRENCH

**STANLEY**

- For tightening back / tap nuts on basins and other hard to reach fasteners
- Forged steel body for durability
- Fixed wrench with 1/2" BSP and 3/4" BSP ends
- Adjustable wrench with reversible direction and swivel knurled hook for positive grip

STANLEY	Description				£
0-70-454	Basin Wrench – Fixed	Card	6	3253560704544	11.91
0-70-453	Basin Wrench – Adjustable	Card	6	3253560704537	15.48

## SMALL DIAMETER PIPE BENDER

**STANLEY**

- For precise bends on 6, 8 & 10mm copper pipe
- Die cast body for strength and durability
- Knurled non-slip grips
- Clear graduations for accurate bends

STANLEY	Description				£
0-70-451	Pipe Bender – 6, 8 & 10mm	Card	6	3253560704513	23.83

## PIPE BENDER

**STANLEY**

- For precise crease free bends on 15 & 22mm copper pipe
- Durable steel arms and hardened rollers
- Long arms for high leverage
- Can be gripped in a vice for bench use

STANLEY	Description				£
0-70-452	Pipe Bender – 15 & 22mm	Box	1	3253560704520	83.49

# DRYWALL TOOLS

## STAINLESS STEEL TAPING KNIVES

STANLEY

- Stainless steel blade prevents rusting and provides durability
- Smooth zinc alloy cap
- Blade tapered from handle to tip provides flexibility
- Bi-material handle for comfort
- Hang hole for easy storage

STANLEY	Description				£
STHT0-05895	Stainless Steel Taping Knife 8"/203mm	Card	4	3253560058951	9.52
STHT0-05771	Stainless Steel Taping Knife 10"/254mm	Card	4	3253560057718	10.71
STHT0-05776	Stainless Steel Taping Knife 12"/305mm	Card	4	3253560057763	11.91

## STAINLESS STEEL CORNER TOOLS

STANLEY

- Stainless steel blade prevents rusting and provides durability
- Blade tapered along top to create a smooth even finish
- Bi-material handle for comfort
- Hang hole for easy storage

STANLEY	Description				£
STHT0-05777	Stainless Steel Inside Corner Tool	Card	4	3253560057770	9.53
STHT0-05622	Stainless Steel Outside Corner Tool	Card	4	3253560056223	9.53

## STAINLESS STEEL MARGIN TROWELS

STANLEY

- Stainless steel blade prevents rusting and provides durability
- Bi-material handle for comfort

STANLEY	Description				£
STHT0-05897	Margin/Window Trowel – 3-1/4"x4 (82mmx101mm)	Card	6	3253560058975	13.11
STHT0-05896	Margin/Edging Trowel 3Pc Set -2"x5" (51mmx127mm) 1-1/2"x5" (38mmx127mm) 3-1/4"x4-1/4" (82mmx108mm)	Box	4	3253560058968	47.71

## STAINLESS STEEL JOINTING KNIVES

STANLEY

- Stainless steel blade prevents rusting and provides durability
- Smooth zinc alloy cap
- Blade tapered from handle to tip provide flexibility
- Bi-material handle for comfort
- Hang hole for easy storage

STANLEY	Description				£
STHT0-05786	Stainless Steel Joint Knife 4"/101mm	Card	6	3253560057862	8.34
STHT0-05864	Stainless Steel Joint Knife 6"/152mm	Card	6	3253560058647	9.52
STHT0-28000	Stainless Steel Joint Knife 4"/101mm w/#2 Phillips Bit	Card	6	3253560280000	8.92
STHT0-28034	Stainless Steel Joint Knife 5" 127mm w/#2 Phillips Bit	Card	6	3253560280345	9.52
STHT0-28041	Stainless Steel Joint Knife 6"/152mm w/#2 Phillips Bit	Card	6	3253560280413	10.12

## STAINLESS STEEL TROWELS

STANLEY

- Stainless steel blade prevents rusting and provides durability
- Slight bow in blade allows users to make perfect drywall joints
- Bi-material handle for comfort

STANLEY	Description				£
STHT0-05898	Trowel 280mm x 130mm Curved Corners	Card	6	3253560058982	20.27
STHT0-05899	Trowel 320mm x 130mm Curved Corners	Card	6	3253560058999	21.47
STHT0-05900	Finishing Trowel 320mmx130mm	Card	6	3253560059002	23.84

## COMPOUND MIXERS

STANLEY

- Chuckable hexagonal bar profile
- Perfect for mixing compound, paint and other materials
- Mixer has wings and a protective extension to avoid contact with the bucket

STANLEY	Description				£
STHT2-28042	Jointing Compound Mix 80mm Ø	Card	12	3253562280428	7.14
STHT2-28043	Jointing Compound Mix 100mm Ø	Card	6	3253562280435	8.93
STHT2-28044	Jointing Compound Mix 120mm Ø	Card	6	3253562280442	10.12

MUD PANS

STANLEY

- Plastic – flexible for easy cleaning
- Stainless steel – for durability

STANLEY	Description				£
STHT0-05866	Mud Pan 10"/254mm – Plastic	Box	6	3253560058661	4.75
STHT0-05867	Mud Pan 12"/305mm – Stainless Steel	Box	6	3253560058678	15.49

HAND SANDER

STANLEY

- Heavy duty ribbed aluminium body stays flat and rigid
- Strong clamps to hold paper or screens
- Bi-material handle for comfort
- Accepts most sandpaper and sanding screens

STANLEY	Description				£
STHT0-05927	Hand Sander	Card	4	3253560059279	11.93

POLE SANDER

STANLEY

- Heavy duty ribbed aluminium body stays flat and rigid
- Strong clamps to hold paper or screens
- Bi-material handle for comfort
- Accepts most sandpaper and sanding screens

STANLEY	Description				£
STHT0-05928	Aluminum Pole Ultilty Sander	Box	2	3253560059286	27.42

SANDING SCREENS

STANLEY

- Available in K80 and K120

STANLEY	Description				£
STHT0-05929	Sanding Screen K 80 10PK	Bag	12	3253560059293	4.16
STHT0-05930	Sanding Screen K 120 10PK	Bag	12	3253560059309	5.35

DRYWALL EDGE STRIPPER

STANLEY

- Twin cutting blades to cut both sides of the drywall
- Bi-material handle for comfort
- Adjustable cutting depth
- Replacement blades available

STANLEY	Description				£
STHT1-16069	Drywall Edge Stripper	Box	4	3253561160691	29.81
STHT0-16131	Replacement Wheel for 16-069	Bag	12	3253560161316	4.76

DRYWALL CIRCLE CUTTER

STANLEY

- For cutting perfect holes in drywall up to 16" in diameter
- Precision calibrated
- Easy to read graduations

STANLEY	Description				£
STHT1-05878	Circle Cutter	Card	4	3253561058783	8.93

DRYWALL PANEL CARRY

STANLEY

- Synthetic light resistant body that does not damage the board
- Aids balance and control when carrying large boards
- 14" handle for extra reach
- Hi-visibility yellow makes it easy to locate

STANLEY	Description				£
1-93-301	Drywall Panel Carrier	Card	6	3253561933011	11.91

WALL BOARD CARRY HANDLES

STANLEY

- Sold in pairs
- Helps when carrying large boards and sheet materials
- Bi-material handle for comfort

STANLEY	Description				£
STHT1-05868	Wall Board Carry Handles	Box	4	3253561058684	23.84

DRYWALL SUPPORT

STANLEY

- Heavy duty telescopic aluminium support to keep ceiling boards in place
- Adjustable pole for easier lifting of boards and holding
- Strong clamps to hold the board firmly
- Sold in singles

STANLEY	Description				£
STHT1-05932	Telescopic Drywall Support	Box	2	3253561059322	35.78

DRYWALL SCREW ADAPTORS

STANLEY

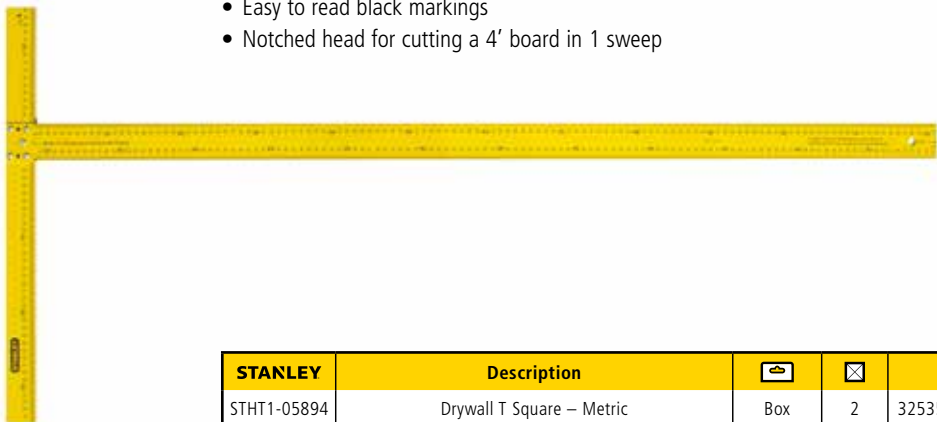

- For quick fixing of drywall screws
- Sinks #2 fasteners to the correct depth setting

STANLEY	Description				£
STHT0-16137	Drywall Screw Adapter	Card	12	3253560161378	5.95
STHT0-05926	Drywall Screw Adapter – Magnetic	Card	6	3253560059262	7.14

DRYWALL T SQUARE – METRIC

STANLEY

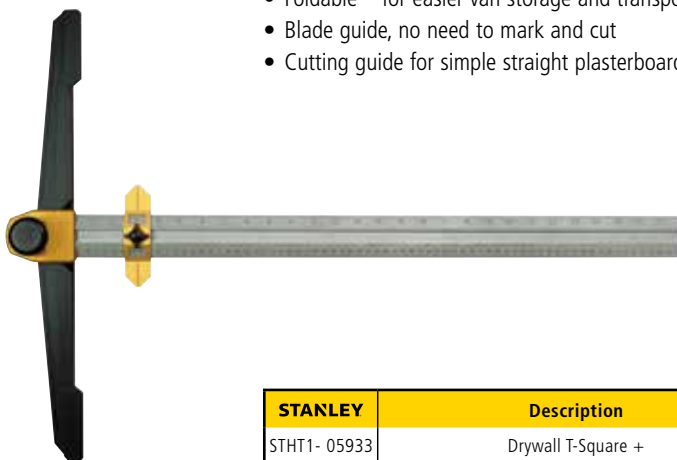

- Easy to read black markings
- Notched head for cutting a 4' board in 1 sweep

STANLEY	Description				£
STHT1-05894	Drywall T Square – Metric	Box	2	3253561058943	23.83

DRYWALL T-SQUARE +

STANLEY

- Aluminium design – jobsite tough but lightweight
- Metric/Imperial measurements
- Foldable – for easier van storage and transport
- Blade guide, no need to mark and cut
- Cutting guide for simple straight plasterboard cuts

STANLEY	Description				£
STHT1- 05933	Drywall T-Square +	Box	1	3253561059339	32.41

DRYWALL FOOT LIFTER

STANLEY

- Steel construction for versatility and durability
- Adjustable design which extends for greater lift
- Carry handle for easy moving

STANLEY	Description				£
STHT0-05939	Drywall Foot Lifter	Box	1	3253560059392	23.15

# TOOL STORAGE

# TOOLBOXES

## FATMAX® 28" TOOLBOX + WHEELS & HANDLE

**STANLEY**  
**FATMAX**

- Telescopic handle and wheels for transportation of heavy loads
- 4mm structural foam plastic for durability and long life
- Waterproof storage solution (rated IP53)
- All round water seal ensures safe and dry storage
- Structural foam plastic construction for extra strength
- Extra large storage capacity and portable tote tray
- V-groove in the lid for cutting timber and pipework
- Tough soft grip handle
- Metal latches with padlock eyes

STANLEY	Description				£
FMST1-75761	FatMax® 28" Toolbox + Wheels & Handle	Box	3	3253561757617	52.95

## FATMAX® WATERPROOF TOOLBOXES

**STANLEY**  
**FATMAX**

- Waterproof storage solution (rated IP53)
- All round water seal ensures safe and dry storage
- Structural foam plastic construction for extra strength
- Extra large storage capacity
- Portable tote tray
- V-groove in the lid for cutting timber and pipework
- Tough soft grip handle
- Metal latches with padlock eyes

NOTES

NOTES

CONDITIONS OF SALE

JANUARY 2018

These conditions are written mainly in plain English. In these conditions “we” means Stanley Black & Decker UK Limited or Stanley Black and Decker Ireland, subsidiaries of Stanley Black & Decker UK Limited or Stanley Black & Decker Ireland, and “you” means the person who accepts a quotation for the sale of the goods and whose order for the goods is accepted by Stanley Black & Decker UK Limited or Stanley Black & Decker Ireland

CATALOGUE ITEMS

1. Quotations and Orders

a) All quotations are made and orders accepted under the following conditions. We must give written agreement to new or altered conditions. All orders accepted by us are under these conditions and not your conditions.

b) Orders must be for boxes or cartons of items. We can vary order quantities to meet this condition.

c) You cannot return any goods unless you have our permission, and only with an approved Returns Material Authority number.

d) Each order will be delivered to one address. We will only deliver to your address and not a third party.

e) Once we have processed an order you cannot cancel or change it. As we continuously improve our products we can alter specifications without telling you and in these circumstances you have no right to cancel any order to claim damages. Made to order goods cannot be cancelled under any circumstances once the order has been accepted.

f) The price we charge you for the goods is the price of them on the date of your order. We will add V.A.T. to our prices at the proper rate on the date we send the goods.

g) Any goods shall be sold subject only to these terms and conditions and, for the avoidance of doubt, shall not be sold upon any sale or return basis.
2. Delivery

a) We will try to meet all delivery dates, but we are not legally liable for any delay in delivering or any losses caused by a delay. Time shall not be of the essence for delivery.

b) Standard terms of delivery are DAP (Delivered at Place) unless otherwise stated.

c) Unless we agree otherwise we will deliver goods by our standard delivery service choosing the most convenient and economical method available at the time of delivery. We will only make deliveries by other means if you ask us to and you pay.

d) We will deliver and collect goods in normal working hours unless we have agreed otherwise. If this is inconvenient and you ask us to deliver or collect goods at a different time there will be a charge.

e) Carriage charges are paid on all orders of a minimum net value. No orders, apart from spare parts will be accepted below this value.
3. Risk of Loss

a) Once the goods have been delivered to your premises you are responsible for any loss or damage caused to the goods after you have received them.

b) You must examine the goods immediately when they are delivered and tell us about any damage to, or shortages of, boxes and / or cartons within two working days. If the contents of any cartons are missing or damaged you should tell us within fifteen working days of the date of the invoice. When the goods are delivered you must also write details of any visible damage to the goods on the carrier’s delivery sheet.
4. Accepting Goods

We will assume you have accepted the goods fifteen business days after they have been delivered unless you tell us about any complaints within that period. Also, if you, your agents, employees or licensees have used the goods, we will count this as accepting the goods.
5. Guarantees

a) We only guarantee that when we deliver the goods they will not be damaged or have any faults. We are not liable for fair wear and tear.

b) If you think that the goods are faulty you should tell us and wait for an instruction to either return the goods to a place we tell you or keep the goods for us to inspect. If we accept that there is a fault we will either repair or replace the faulty part or parts or refund the original price of the goods.

c) The situation described in 5(b) above shall not apply to the following:

1) any goods which have been repaired or altered by somebody who isn’t an employee of ours.

2) goods which have been mixed with other goods or used to create other products.

3) any goods which, in our opinion, have been subject to any accident or to damage or which have been improperly stored, maintained or used.

d) We are not liable for the following:

1) any direct loss or damage except the liabilities we have already mentioned.

2) any indirect, consequential or incidental loss or damage of any kind (including loss of profits, revenue or contracts) or for any damage to or destruction of any property.

3) injury to, or the death of, any person unless that injury or death is caused by our carelessness or that of our employees.

e) Our only guarantees, conditions and liabilities are those given in this document.

f) You must indemnify us against all claims, actions, costs, losses, damages or expenses caused by or in connection with the goods unless we are liable under these conditions.

g) If we repair or replace any goods under 5(b) we will take the date that the repair is finished or the goods are replaced to be the date on which the goods were delivered.
6. ‘Force Majeure’

Without prejudice to any other terms of this agreement we are not liable for any act or omission or if we do not enforce, or we delay enforcing any condition in this Agreement because of any circumstances or causes beyond our control.
7. Payment

a) Payment is due at the end of the following month from the date of Invoice unless otherwise advised.

b) If you delay paying for no good reason we may choose to suspend all deliveries to you until we have received all payments which are due.

c) If you do not pay within our terms we reserve the right to charge interest in accordance with the provisions and rates provided in The Late Payment of Commercial Debts (Interest) Act 1998.

- d) If you disagree with an invoice you must tell us about this within 7 days of receiving the goods, and that if our investigation confirms that your query is justified you do not need to pay for the amounts disputed on the invoice or any interest due.

8. Owning the Goods

Ownership and title to the Goods shall remain with Stanley Black & Decker UK Limited or Stanley Black & Decker Ireland until

a) You have paid in full for the goods.

b) You have made full payment for any other goods or products supplied under any contracts or on any account whatsoever between Stanley Black & Decker UK Limited or Stanley Black & Decker Ireland and all other sums whatever due from you to Stanley Black & Decker UK Limited or Stanley Black & Decker Ireland have been paid in full.

c) If you pay by cheque, bill of exchange or promissory note, we own the property until the same has been honoured. We may apply any payments you make to any of your invoices which we see fit.

d) Until you have paid for the goods you will be acting as our fiduciary agent and bailee. You must keep records of the goods and store the goods in a way that makes them clearly identifiable as being our property. These goods should be insured by you or as part of your general insurance cover. We will assume that any goods you have which we supplied belong to us (unless you can prove otherwise)

e) If you:

1) make any arrangement with your creditors;

2) go into liquidation;

3) appoint a receiver to manage all or part of your assets;

4) fail to make payment for the goods; or

5) cannot, in our opinion pay your debts; then, we have the following rights:

1) to enter any property and repossess the goods without giving you notice.

2) to give you written notice that you must not sell or get rid of the goods until we have received full payment for them.

3) to cancel any undelivered goods and stop any goods that are being transported to you.

f) At any time we may give you the ownership of the goods if we give you notice of our intention to do so. Under condition 8(c) ownership of the goods will pass to you when you sell or get rid of goods which we own immediately before you sold or got rid of them.

g) We may sue you for the price of the goods when the payment is due even though the ownership of the goods may not have passed to you.

h) In any circumstances prevailing under clause 8e) (1)-(5) then we shall in respect of any rebate arrangement with you exercise our unfettered right to offset any sums due from you against any amount on our accounts receivable ledger by way of credit note under any rebate arrangement, in full or part satisfaction of any sum due to the Company by you.

i) In respect of clause 8h) you the Customer undertake to keep us informed upon written 14 day notice of any event or circumstance that places your business in a precarious financial position which may lead to an administration order bankruptcy or liquidation and we undertake to provide you with written 7 day notice of our intention to exercise our rights by way of right of offset.

9. We may impose restrictions on the reselling of goods, subject to U.K. and E.E.C. trading laws.

10. If any condition or part of condition in this Agreement is not valid or cannot be enforced this will not affect any part of the condition or Agreement.

11. If the ownership of your company changes we will automatically cancel this Agreement and negotiate a new one.

12. These conditions of sale only apply to your company and your own branch companies which carry out similar trade. They are not offered to your associate companies, either within or outside its trade unless we agreed this when we were negotiating this Agreement.

13. You shall and shall procure that your officers, employees, agents, sub-contractors and any other persons who perform services for or on behalf of you in connection with this Agreement shall:

a) not commit any act or omission which causes or could cause it or Stanley Black & Decker UK Limited or Stanley Black & Decker Ireland to breach or commit an offence under any laws relating to anti-bribery or anti-corruption;

b) comply with Stanley Black & Decker UK Limited or Stanley Black & Decker Ireland anti-corruption policy as updated from time to time, a current copy of which is available upon request;

c) keep accurate and up to date records showing all payments made and received and all other advantages given and received by it in connection with this Agreement and the steps it takes to comply with this condition and permit Stanley Black & Decker UK Limited or Stanley Black & Decker Ireland to inspect those records as required.

d) promptly notify Stanley Black & Decker UK Limited or Stanley Black & Decker Ireland of any request or demand for any financial or other advantage received by it; and any financial or other advantage it gives or intends to give whether directly or indirectly in connection with this Agreement; and

e) promptly notify Stanley Black & Decker UK Limited or Stanley Black & Decker Ireland of any breach of this condition. Stanley Black & Decker UK Limited or Stanley Black & Decker Ireland may terminate this Agreement immediately by giving notice to that effect to you if you are in breach of condition 13.

Governing Law  
This Agreement, for all purposes, is governed and construed by the laws of England and Wales and both parties agree to submit to the exclusive jurisdiction of the Courts of England and Wales.  
Unless we have agreed otherwise in writing, our standard conditions of sale also apply.
